NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

1. Legal status and general information about the company

Allterco JSCo, Sofia, is entered in the Commercial Register of the Registry Agency with UIC as per Bulstat (Unified Identification Code as per the Bulgarian Statistical Register): 201047670. The company is with seat and address of management in Sofia 1407, 103, Cherni Vrah Blvd.

Since December 2016 the shares of Allterco JSCo are traded on Bulgarian Stock Exchange and from 22.11.2021 company's shares are also traded on the Frankfurt Stock Exchange.

The scope of business of Allterco JSCo includes the acquisition, management, evaluation and sale of participations in Bulgarian and foreign companies; acquisition, management and sale of bonds; acquisition, evaluation and sale of patents, assignment of licenses for use of patents to companies in which the Company participates; financing of companies in which the Company participates.

The company is managed by the Board of directors and is represented by Svetlin Todorov, Dimitar Dimitrov and Wolfgang Kirsch.

2. Basis for preparation of the financial statements and accounting principles.

2.1. General financing reporting framework

The company maintains its current accounting and prepares its financial statements in accordance with the requirements of the Bulgarian commercial and accounting legislation.

These financial statements have been prepared in accordance with the requirements of the International Accounting Standards, published by the International Accounting Standards Board and adopted by the European Union. As of 30th September, 2022, IASs include the International Accounting Standards (IASs), the International Financial Reporting Standards (IFRSs), the Interpretations of the Standing Interpretation Committee and the Interpretations of the IFRS Interpretation Committee, approved by the IAS Committee and in power since 1st January, 2022.

The IAS Committee issues every year the standards and their interpretations, which after the formal approval by the EC, are valid for the year in which they are issued. However, a big part of them is not applicable to the company's business because of the specific issues that are addressed in them.

2.2. Initial application of new and amended IFRSs in force for the current accounting period

2.2.1. Accounting standards applicable for the current reporting period

The management considered all standards and clarifications to the standards, which are applicable to the activities of the Company and which are officially adopted by the EU as of the date of preparation of the current financial statements.

The management reviewed the amendments in the existing accounting standards which are enforceable as of

*NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022*

Unless otherwise stated, all amounts are in BGN thousand.

1st January, 2022 and assessed that no changes in the current accounting policy are necessary.

2.2.2. Standards and clarifications issued by IASC awaiting adoption by the EU Commission

<i>Standard or clarification, date of amendment and enforcement</i>	<i>Name of the standard or clarification</i>	<i>Adoption status by EU Commission</i>
Amendments to IAS 1 issued on 23 January 2020 and 15 July 2020, in effect for annual financial periods starting at or after 1 January 2023	Classification of liabilities as current or non-current and classification of assets as current and non-current – postponement of enforcement date	Waiting for a date of adoption
Amendments to IAS 1 issued on 12 February 2021, in effect for annual financial periods starting at or after 1 January 2023	Financial statements presentation and disclosure of accounting policies	Waiting for a date for adoption
Amendments to IAS 8 issued on 12 February 2021, in effect for annual financial periods starting at or after 1 January 2023	Accounting policies, Amendments in the accounting assessments and mistakes: Definition of accounting assessments	Waiting for a date for adoption
Amendments to IAS 12, issued on 7 May 2021, in effect for annual financial periods starting at on after 1 January 2023	Corporate profit tax: Deferred tax related to assets and liabilities arising from one deal	Waiting for a date for adoption
IFRS 17 issued on 9 December 2021, in effect for annual financial periods starting at or after 1 January 2023	Insurance contracts: Initial application of IFRS 17 and IFRS 9 – Comparable data	Submitted for adoption by the Commission, expected to be adopted during the first quarter of 2022

2.3. Accounting principles

The individual financial statements of the Company have been prepared in accordance with the going concern principle. The latter assumes that the Company will continue to exist in the foreseeable future.

During the last reporting period the continuing COVID-19 pandemic did not cause any negative effect on the business activities of Allterco and its subsidiaries. In February 2022 a military conflict between Russia and Ukraine started. To the extent that the Company does not have business relations with companies or organizations from those two countries, the management believes that this event is not expected to have a direct or indirect impact on the financial results and financial position of the company

The Management has no plans or intentions to sell the business or discontinue the operations, which could significantly change the book value or classification of the assets and liabilities recognized in the financial statements.

The valuation of assets and liabilities and the measurement of income and expenses are carried out in compliance with the principle of historical cost. This principle has been modified in certain cases by revaluing certain assets and / or liabilities to their fair value at 30th September of current year and December 31 of previous year, as set out below.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

2.4. Subsidiaries. Consolidation.

A subsidiary is a company that is controlled by the parent company. Control is the power to govern the financial and operating policies of a subsidiary so as to obtain benefits from its activities. As of September 30, 2022 the Company has three subsidiaries registered in Bulgaria, 2 subsidiaries abroad and 1 associated company abroad. In these individual financial statements, investments in subsidiaries are reported at acquisition cost and these statements do not constitute consolidated financial statements within the meaning of *IFRS 10 Consolidated Financial Statements*.

In order to gain a complete picture of the financial position, results of operations, and changes in the financial position of the group as a whole, users of these individual financial statements need to read it together with the consolidated financial statements of the company for the period ending on 30th September 2022. The company prepares consolidated financial statements, which according to regulatory requirements in Bulgaria are presented after the individual financial statements are approved.

2.5. Functional and reporting currency

Functional currency is the currency of the main economic environment in which a company operates and in which most of its revenues and costs are incurred. The functional currency reflects the main deals, events and term significant for the company.

The Company reports the transactions in the accounting and prepares its financial statements in the national currency of the Republic of Bulgaria - the Bulgarian lev, adopted by the Company as a functional currency.

The present individual financial statements are prepared in thousand BGN, unless something different is stated. Income per share is presented in BGN.

2.6. Foreign currency

The transactions in foreign currencies are booked initially as the amount in foreign currency is translated in reporting currency by applying the currency fixing of Bulgarian National Bank as of the date of the transaction. Currency exchange differences that arise at settlement of foreign currency open positions or at time of reporting such positions when the currency exchange rate is different than the initial exchange rate reported in the profit, loss or other comprehensive income for the respective period. The cash positions in foreign currencies as of 31st December 2020 and 30th September 2022 are evaluated in the current financial statements at the closing exchange rate of Bulgarian National Bank. (2.00639 BGN = 1 USD; 0,184795 NOK = 1 BGN; 1,95583 BGN = 1 EUR)

2.7. Use of estimates and judgements

The application of IAS stipulates that management of the Company should use some accounting assumptions

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

and estimates in the process of preparing financial statements in order to the value of some assets, liabilities, revenues, costs and of balance sheet assets and liabilities. This is done on the basis on best judgment by management based on historic experience and analysis of all relevant factors as of the date of preparing the financial statements. Actual values may differ from the management estimates presented in the financial statements.

2.8. Comparative data

Bulgarian accounting legislation stipulates that the financial year ends on December 31 and all companies are obliged to prepare and present financial statements as of this date together with comparative data for the same period of previous year. If necessary, the comparative data for the previous year is amended in order to achieve better comparability between the two periods.

3. Definition and determination of the elements of the financial report

3.1. Property, plant and equipment

Property, plant and equipment (non-current tangible assets), except for land, are presented in the financial statements at acquisition price (cost) less the accumulated depreciation and eventual impairment losses.

Initial acquisition

Upon their initial acquisition, the properties, plant and equipment are valued at acquisition price (cost), which includes the purchase price, incl. customs duties and any direct costs necessary to bring the asset to working condition. The direct costs are: costs for site preparation, costs for initial delivery and processing, installation costs, costs for fees of persons related to the project, non-refundable taxes, etc.

The Company has set a value threshold of BGN 700, below which the acquired assets, regardless of the fact that they have the characteristics of a non-current asset, are treated as a current expense at the time of their acquisition.

Subsequent expenses

The expenses for repair and maintenance are recognized as current expense in the period in which they are incurred. Subsequent expenses related to property, plant and equipment, which have the characteristics of replacement of some key parts or reconstruction and that meet the criteria for recognition as a long-term asset are capitalized increasing the book value if the corresponding asset. Also, the remaining useful life of the asset is reassessed at the time of capitalization. At the same time, the undepreciated part of the substituted parts is written off from the book value of the assets and is recognized as current expense for the period.

Depreciation of property, plant, equipment and intangible assets

The depreciation of properties, plant, equipment and intangible assets is calculated using the straight-line method. The depreciation periods are determined by the management of the Company based on estimated

*NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022*

Unless otherwise stated, all amounts are in BGN thousand.

useful life of assets.

No depreciation is recognized on land, fully depreciated assets and assets that are in process of acquisition as well as on assets held for sale in accordance with IFRS 5 Non-current assets held for sale and discontinued operations.

The following depreciation rates are applied by asset groups:

	30.06.2022	2021
Vehicles	4	4
Computers, peripherals and software	2	2
Office equipment	5 - 6.67	5 – 6.67
Other	6.67	6.67
Intangible assets	6.67	6.67

3.2. Impairment of properties, plant, equipment and intangible assets

At the end of each year a review of the book value is made on all long-term assets that are not reported at fair value in order to determine if there are evidences of impairment. If such evidences exist the Company estimates the recoverable amount of each asset and determines the resulting loss from impairment.

When is impossible to calculate the recoverable value of an asset the Company estimates the recoverable value of the cash generation object of which the asset is part. If the so calculated recoverable value of the asset (that generates cash flows) is lower than its book value, the book value is decreased to the level of recoverable amount of the asset (that generates cash flows). The loss from impairment is recognized in the statement of comprehensive income in the year of occurrence.

In case the loss of impairment is subsequently recovered the book value of the asset (that generates cash flows) is increased up to the revalued recoverable amount but not higher than the value of the asset if no impairment was recognized.

Recovered impairment loss is recognized as a revenue in the statement of comprehensive income in the year when it the recovery was incurred, unless the revaluation of corresponding asset is reported in the revaluation reserve. In this case the revaluation reserve is amended.

3.3. Investments in subsidiaries and associated companies

The long-term investments in shares of daughter and associated companies are presented in the individual financial statements at acquisition cost, which is the fair value of amount paid, including direct costs incurred for the acquisition of the investment, less the accumulated impairment.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

The investments in daughter and associated companies are subject to annual assessment for impairment. In case there are evidences for impairment it is recognized in the statements of comprehensive income. In case of sale or purchase of investments in daughter or associated companies the effective date of the deal is the date of closing.

The investments are written off when the rights associated with them are transferred to another party when the legal requirements for such transfer are met and the control over the investments is lost. The profit (loss) from the sale of investments is reported as part of financial income or financial expenses in the statement of comprehensive income for the year.

3.4. Other long-term capital investments

Other long-term financial investments are non-derivative financial assets in the form of shares and stakes of other companies (minority interest) held with a long-term perspective.

Initial evaluation

Initially, equity investments are recognized at acquisition price, which is the fair value of the consideration paid, including direct expenses of the investment acquisition (the financial asset). All purchases and sales of equity investments are recognized on the “settlement date” of the transaction.

Subsequent evaluation

The capital investments held by the company are subsequently measured at fair value. The effects of the subsequent measurement to fair value are presented in the statement of comprehensive income (in other components of comprehensive income) and respectively in the reserve related to financial assets at fair value, through the other comprehensive income. These effects are transferred to retained earnings on the disposal (sale) of the respective investment.

3.5. Non-current assets held for sale

Non-current assets are classified as held for sale if their book value will be recovered through sale rather than through continuing use in the Company's operations. This condition is considered to exist only when the sale is highly secure and the relevant non-current assets are available for immediate sale in their present condition.

Non-current assets classified as held for sale are measured at the lower value between the fair value and the book value less the costs to sell.

3.6. Financial instruments

A financial instrument is any contract that gives rise to both a financial asset in one enterprise and a financial

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

liability or equity instrument in another enterprise. Financial assets and liabilities are recognized in the statement of financial position when the company becomes a party to the contractual provisions of the financial instrument that gave rise to the asset or liability. Financial assets are derecognized from the statement of financial position after the contractual rights to receive cash flows have expired or the assets have been transferred and their transfer meets the derecognition requirements in accordance with IFRS 9 *Financial Instruments*.

Financial liabilities are written off from the statement of financial position when and only when they are repaid - i.e., the obligation specified in the contract has been canceled, annulled or its term has expired.

The activity of the company does not presuppose the existence of various financial instruments. The main financial instruments included in the statement of financial position of the company are presented below.

Trade and other receivables

Trade receivables are amounts owed by customers for goods and services sold in the ordinary course of business. They are usually due for short-term settlement and are therefore classified as current. Trade receivables are initially recognized in the amount of unconditional remuneration due, unless they contain significant financing components.

The Company holds trade receivables for the purpose of collecting contractual cash flows and therefore measures them at depreciated cost using the effective interest method. Discounting is not performed when its effect is insignificant.

As of the date of preparation of the financial statements, the company assesses whether there is objective evidence of impairment of trade receivables that are individually significant. An impairment loss is recognized whenever there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivable.

The amount of impairment is the difference between the book value and the recoverable amount. The latter represents the present value of the expected cash flows, discounted with the effective interest rate. The amount of impairment of trade receivables during the current period is reported as an expense. When a receivable is expected to be collected within one year, it is reported as a current asset. In other cases, receivables are reported as non-current assets.

Future cash flows designated for a group of financial assets that are collectively measured for impairment are determined based on historical information about financial assets with credit risk characteristics similar to those of the reviewed financial assets group. Assets that are individually impaired are not included in an impairment group.

The Company uses a simplified approach in accounting the impairment of trade and other receivables and

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

recognizes an impairment loss as expected credit losses for the entire term. They represent the expected shortfall in contractual cash flows, given the possibility of default at any time during the term of the financial instrument.

Significant financial difficulties of the debtor, probability of bankruptcy and liquidation, financial restructuring or inability to repay the debt (more than 30 days) are considered as indicators that the trade receivable should be impaired.

In estimating expected credit losses on trade receivables, the company uses a provision matrix as well as its past experience with losses on trade receivables to estimate the expected credit losses for the entire term of the financial assets.

The significant part of the contracts with clients and additional cash installments are with daughter companies and because of this the Management assesses the possibility of occurrence of credit losses as rather minimal.

Cash and cash equivalents

Cash and cash equivalents in BGN are valued at their nominal value, and cash in foreign currency - at the closing exchange rate of the BNB at the end of each reporting period.

Cash for the purposes of compiling the statement of cash flows are monetary funds in cash and in bank accounts.

Loan liabilities

Interest-bearing loans are initially recognized at fair value formed from the received cash receipts less the costs to sell. After initial recognition, interest-bearing loans are measured at depreciated value, with any difference between the original value and the maturity value being recognized in profit or loss for the period of use of the loan based on the effective interest rate method. Received interest loans, at the occurrence of which no expenses related to the transaction have been incurred, are not amortized. The received bank overdrafts are treated in the same way, where the recipient has the right to repeatedly utilize or repay the loan within the pre-agreed limit.

The financial expenses, including direct borrowing costs, are included in profit or loss using the effective interest rate method, except for transaction costs on bank overdrafts, which are recognized in profit or loss on a straight-line basis over the period, for which the overdraft is agreed.

Interest-bearing loans are classified as current when they are to be settled within twelve months of the end of the reporting period.

Payables to suppliers, other current payables and advances received

Trade and other payables arise as a result of goods or services received. Short-term payables are not depreciated.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

Trade payables are recognized initially at fair value and subsequently at amortized cost using the effective interest rate method.

3.7. Registered share capital

The registered capital of the company is presented at the nominal value of issued shares and it corresponds to the value in the last court registration.

Redeemed shares are presented in the statement of financial position at their cost of acquisition after the gross purchase value is reducing the company's equity.

3.8. Reserves

As reserves in the statement of financial position of the company are presented the accumulated financial results from previous years, the reserves from premiums, related to the issue of shares, reserves from investments reported at fair value through other comprehensive income, as well as statutory reserves required by the Commercial Law and the Articles of the Company. The shareholders of the company may dispose capital reserves after a decision of the General Meeting.

3.9. Lease

On the date of entry into force of the contract, the Company assesses whether the contract represents or contains a lease. In particular, whether the contract transfers the right to control the use of the identified asset for a certain period of time.

The company as a lessee

The Company applies a unified approach to the recognition and assessment of all leases, except for short-term leases (i.e., leases with a lease term of up to 12 months) and leases of low-value assets. The Company recognizes lease liabilities for the payment of lease installments and assets with the right of use, representing the right to use the assets.

Assets with the right of use

The Company recognizes assets with a right of use from the date of the lease (i.e., the date on which the main asset is available for use). Assets with the right of use are assessed at the acquisition price less the accumulated depreciation and impairment losses and adjusted for any revaluation of lease obligations.

The acquisition price of the assets with the right of use includes the sum of the recognized lease obligations, the initial direct costs incurred and the lease payments made on or before the start date of the lease, an estimate of the costs to be incurred by the lessee in dismantling and relocating the asset, the restoration of the site on which it is located or the restoration of the asset to the condition required under the terms of the lease, reduced

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

by any incentives received under the lease. The assets with the right of use are depreciated on a straight-line basis over the lease term.

If at the end of the lease term the ownership of the leased asset is transferred to the Company, or the acquisition price reflects the exercise of a purchase option, the depreciation is calculated using the expected useful life of the asset.

Lease liabilities

From the starting date of the lease, the Company recognizes lease liabilities measured at the present value of the lease payments that will be made during the lease term. Lease payments include fixed installments (including fixed payments on the merits) less any eligible lease incentives, variable lease payments that depend on an index or interest rate, and amounts that are expected to be paid under guarantees for residual value. Lease payments also include the price of exercise of a purchase option about which it is reasonably certain that it will be exercised by Company, as well as penalties for termination of the lease if the lease term reflects the Company's exercise of an option of termination.

Variable lease payments that do not depend on an index or interest rate are recognized as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses the intrinsic interest rate on loans at the start date of the lease, as the interest rate set in the lease cannot be reliably determined. After the starting date, the amount of the lease liabilities increases with the interest and decreases with the lease payments made. In addition, the book value of leased liabilities is revalued if there is a modification, change in the lease term, change in lease payments (for example, changes in future payments as a result of a change in the index or interest rate used to determine those lease payments) or a change in the valuation of the option to purchase the main asset.

Short - term leases and leases of low-value assets

The Company applies the exemption from recognition of short-term leases in respect of its short-term leases of buildings (for example, leases with a lease term of 12 months or less from the starting date and which do not contain a purchase option). The Company also applies the exemption from recognizing leases of low-value assets to leases of office equipment that is considered to be of low value. Lease payments on short-term leases and leases of low-value assets are stated as an expense on a straight-line basis over the term of the lease.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

3.10. Liabilities to employees

Defined contribution plans

The government of the Republic of Bulgaria undertakes the liability to ensure pension payments on the basis of defined contribution plans. The liability of the Company to pay the amounts booked under the defined contribution plans for the employees is recognized in the statement of comprehensive income at the time of occurrence of the liability.

Paid annual leave

The Company recognizes as a liability undiscounted amount of estimated cost of annual paid leave, in accordance with the Labor Code and its internal rules, which is expected to be paid to employees in return to their labor for the past reporting period.

Defined income for retirement

In compliance with the Labor Code, when a labor contract of an employee that obtained the right for pension is terminated, the Company pays a compensation at the amount of two gross monthly salaries, if the employee worked for the Company less than ten years, or six gross monthly salaries if the employee worked for the Company more than ten years. The Company estimates that the amount is not significant and therefore it is not included in the financial report.

3.11. Recognition of revenue and expenses

Revenue from services and other revenue

Revenue from sales and operating costs are accrued at the time of their occurrence, regardless of the timing of monetary receipts and payments. The reporting and recognition of income and expenses are applied in compliance with the requirements for causal connection between them.

Revenue is measured at the fair value of the consideration received or receivable, less the amount of any discounts granted.

The Company recognizes revenues when the amount of the revenue can be measured reliably, when it is possible for the company to obtain future economic benefits and when it meets specific criteria for each activity of the company specified here below.

The amounts collected on behalf of third parties, such as sales taxes, as value added tax is, are excluded from revenue.

Revenue from services

Revenues from services (administrative or other) are recognized on a monthly basis in the month when the services were performed.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

Revenue from participations (Dividends)

Dividend income is recognized in the period when the Company become aware of the right to receive dividend. The dividend income is recognized as other revenue in the statement of comprehensive income.

The *government donations or help* which are received by the Company as a compensation for expenses made are recognized in the profit or loss for the period during which the expenses were made.

The revenue from *government donations*, representing compensation for investment expenses for acquiring assets, are recognizes in the current profit and loss for the whole period of useful life of the assets, which usually is equal to the amortization period of each asset.

The *profit (loss) from sales of plant, machinery, equipment and intangible assets* is recognized as other revenue (expenses).

When assets are *exchanged* the Company recognizes revenue (expenses) from the transaction at the amount equal to the difference between the fair value of the assets received and book value of asset exchanged.

When economic benefits are expected to be spread over several financial periods and their relation to the revenues could be determined only in general or indirectly, the expenses are recognizing in the profit and loss on the basis of procedures for systematic and rational distribution.

Financial income and expenses

The expenses related to a loan, which can be linked to an asset for which the process of acquisition, construction or production, before it is ready for the intended use, takes a significant amount of time, should be capitalized as part of this asset.

All other financial income and expenses are reported in the profit or loss for all instruments held at amortization value though use of the effective interest rate method.

The effective interest rate method is a method of calculating of the amortized value of a financial assets or liability in order to distribute the interest income or expenses over the respective period of time. The effective interest rate is the rate that is used for discounting the expected future cash income or expense throughout the expected useful life of the financial instrument, or in certain cases for a shorter period of time, to the net book value of the financial assets or liability. When calculating the effective interest rate, the Company assess the cash flows by considering all contractual terms of the financial instrument but without including any potential future losses or impairments. The calculation includes taxes, transaction costs, premiums or discounts paid or received by the contractual parties, which are inseparable part of the effective interest rate.

Expenses

The expenses in the Company are recognized at the moment of their occurrence and on the basis of the principles of accrual and comparability. Expenses are recognized when there is a decrease in future economic

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

benefits associated with a decrease in an asset or an increase in a liability that can be measured reliably. Recognition of expenses for the current period is performed when their corresponding income is accrued. An expense is recognized immediately in the statement of comprehensive income when the expense does not create a future economic benefit or when and to the extent that the future economic benefit does not meet the requirements or ceases to meet the requirements for recognition of an asset in the statement of financial position. Expenses are reported on the principle of current accrual and comparability with the reported revenues. They are measured at the fair value of the remuneration paid or payable.

3.12. Income tax expenses

Income tax expense represents the sum of the current income taxes and the tax effect on temporary tax differences. Current income tax is determined on the basis of the taxable profit for the period, applying the tax rate according to the tax legislation as of the date of the financial statements. Deferred tax assets and / or liabilities are the amounts of recoverable and payable income taxes for future periods in respect of deductible and taxable temporary tax differences.

Temporary tax differences are established by comparing the book value of an asset or liability presented in the Statement of financial position with its tax base when applying the tax rules.

Deferred income taxes are calculated using the balance sheet liability method. Deferred tax liabilities are calculated and recognized for all taxable temporary differences, while deferred tax assets are recognized only if it is probable that they will be recovered and if the company will be able to generate sufficient profit in the future from which they to be deducted.

The effect of recognizing the deferred tax assets and / or liabilities is reflected where the effect of the event that gave rise to them is presented.

For events that affect the statement of profit or loss and other comprehensive income, the effect of deferred tax assets and liabilities is also recognized in the statement of comprehensive income.

For events that are initially reported in equity (revaluation reserve) and deferred tax assets and liabilities are recognized at the expense of equity.

In the Statement of financial position, deferred tax assets and / or liabilities are presented as compensation, as they are subject to a single taxation regime.

According to the Bulgarian tax legislation, the company pays corporate profit tax, which is set at 10% of the taxable profit for the respective year. The corporate tax rate for 2023 remains at 10%.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

3.13. Judgments that are crucial in applying the accounting policy of the Company. Key high uncertainty estimates and assumptions.

In the process of applying the accounting policy, the management of the Company makes judgments that have a significant effect on these financial statements. Such judgments are by definition rarely equal to actual results.

As a result, they are subject to constant review and updating and summarize historical experience and other factors, including expectations of future events that management believes are reasonable in the current circumstances.

The estimates and assumptions that carry a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are set out below.

3.13.1. Impairment of investments in subsidiaries

The Management analyzes and evaluates the existence of indicators for impairment of its investments in subsidiaries. The main indicators of impairment are: significant reduction of the volume or cessation of the activity of the Company in which the investment is made; reporting losses for a longer period of time, as well as reporting negative net assets or assets below the registered share capital.

Management's tests and judgments for impairment of investments are made through the prism of its plans and intentions regarding the future economic benefits that are expected to be received by the subsidiaries, incl. trade and production experience, securing positions in foreign markets, expectations for future sales, etc.

For this purpose, variants of forecasts are developed, which take into account the various assumptions about risks, uncertainties and probabilities for the future realization of cash flows and income from these investments. Each of the options is carefully analyzed by the management and the results are weighed when calculating the recoverable amount of the respective investment.

3.13.2. Employees income on retirement

The liability for employee's income on retirement is determined by actuarial valuation. This assessment requires assumptions to be made about the discount rate, future wage growth, staff turnover and mortality rates. Due to the long-term nature of employee's income on retirement, these assumptions are subject to significant uncertainty.

As of the end of reporting period no such assessment is made because most of the employees of the Company are far from retirement age.

3.13.3. Useful life of property, plant and equipment and intangible assets

The financial reporting of property, plant and equipment and intangible assets includes the use of estimates of their expected useful lives and carrying amounts, which are based on judgments by the management of the Company.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

3.13.4. Impairment of receivables

The Management estimates the amount and period of expected future cash flows related to receivables based on experience and considering current circumstances. Due to the inherent uncertainty of this estimate, actual results may differ from those expected. The management of the Company reviews the estimates from previous years and compares them with the actual results.

3.13.5. Lease

Determining the term of the lease for contracts with options for renewal and termination - the Company as a lessee

The Company defines the lease term as the irrevocable lease term, together with any periods covered by the option to extend it, if it is reasonably certain that the option will be exercised, or any periods covered by the option of termination of the lease if it is reasonably certain that the option will not be exercised.

3.14. Determination of fair values

Some of the Company's accounting policies and disclosures require a fair value measurement of financial and non-financial assets and liabilities.

When measuring the fair value of an asset or liability, the company uses observable data as far as possible.

Fair values are categorized at different levels in the fair value hierarchy based on the inputs to the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for similar assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that, directly (i.e., as prices) or indirectly (i.e., derived from prices), are available for monitoring for the asset or liability.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable input data).

If the inputs used to measure the fair value of an asset or liability can be categorized at different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety at that level of the fair value hierarchy whose input information is relevant to the overall assessment.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period in which the change occurs.

More information on the assumptions made in measuring fair values is included in the relevant notes.

3.15. Income per share

Basic incomes per share are calculated by dividing the net profit or loss for the period to be distributed among the shareholders holding ordinary shares by the weighted average number of ordinary shares held for the

*NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022*

Unless otherwise stated, all amounts are in BGN thousand.
period.

The weighted average number of shares represents the number of ordinary shares held at the beginning of the period, adjusted by the number of repurchased ordinary shares and the number of newly issued shares during the period multiplied by the average time factor. This factor expresses the number of days during which the specific shares were held, compared to the total number of days during the period.

Income on impaired shares is not calculated as no impaired shares have been issued.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

The fair value of the bank loan that the company is using, is determined based on the interest rate that the Company expects to receive at the reporting date. The management of the Company believes that these interest rates do not differ significantly from those in force at the time of concluding the bank loan agreement.

The company has no practice of working with derivative instruments.

9. Financial risk management

The Company's activities are exposed to a number of risks related to objective conditions such as market unpredictability, general economic trends, changes in exchange rates.

To minimize the potential negative effects, the Company has adopted policies for overall risk management and assessment and establishing procedures for addressing the identified risks. The overall risk management is focused on forecasting the results of certain areas of the markets where the Company operates in order to minimize the potential negative effects that could affect the financial results. Financial risks are currently identified, measured and monitored using various control mechanisms to adequately assess market conditions and their effects on Company's and to maintaining enough liquid funds and to avoid unjustified concentration of any specific risk.

Risk management is carried out on an ongoing basis under the direct supervision of the Executive Director and the Company's financial experts in accordance with the policy set by the Board of Directors.

The risk management strategy is regularly reviewed in order to update the policies to the dynamics in the market and economic conditions. The company aims to develop discipline and a constructive control environment in which all employees understand their responsibilities through periodic training and application of established standards.

The following describes the different types of risks to which the company is exposed in carrying out its business operations, as well as the approach taken in managing these risks.

Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market prices.

a. Currency risk

The company carries out its transactions mainly on the domestic market and in the European Union. It is not exposed to significant currency risk because almost all its operations and transactions are denominated in Bulgarian levs and euros, and the latter has a fixed exchange rate against the lev by law. During the last financial year, the Company transferred part of its cash in USD in order to optimize bank fees levied on excess cash in bank accounts.

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

The company makes its main deliveries in BGN.

During the reporting period Allterco JSCo provided an additional cash contribution to its subsidiary in USD.

The tables below summarize the exchange rate exposure:

September 30, 2022	in EUR	in USD	In other currency	In BGN	Total
Cash and cash equivalents	3 317	1 544	600	3 852	9 313

TOTAL LIABILITIES	2 027	0	0	712	2 739

Currency sensitivity analysis

The Company is not exposed to currency risk with respect to its euro exposures. In regards to positions in US dollars, it carries a risk, but insofar as they amount to 27% of all foreign exchange exposures of the company, and many of them are to related companies, management considers this risk to be negligible at least at this stage.

b. Price risk

The Company owns shares that are subject to trading on a regulated market, and during 2021 the Company sold part of its shares and made a profit from the transactions. For the remainder of the shares, the Company is exposed to risks of negative changes in the stock markets.

c. Risk of the interest-bearing cash flows

The company does not have a significant concentration of interest-bearing assets, except for free cash on

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

current accounts with banks, so revenues and inflows of operating cash flows are not largely dependent on changes in market interest rates.

At the same time, the outgoing cash flows of Allterco JSCo for 2021 are not exposed to interest rate risk from using a bank loan in EUR, agreed with a fixed interest rate.

Cash on current accounts with banks bear interest at interest rates according to the tariffs of the respective banks.

The management of the Company currently monitors and analyzes its exposure to changes in market interest rates. Different refinancing scenarios, renewal of existing interest-bearing positions and alternative financing are simulated. Calculations are made for significant interest-bearing positions.

TOTAL LIABILITIES	839	-	1 900	2 739

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to meet its obligation and thereby cause a loss to the other party. The financial assets that potentially expose the company to credit risk are mainly receivables from services provided and sales of investments. The company is exposed to credit risk in the event that customers fail to meet their obligations.

The financial assets of the company are concentrated in three groups: monetary funds (cash and bank accounts), receivables from clients and additional cash contributions provided to a subsidiary.

Over 99% of trade receivables (current and non-current) are related to the sale of long-term investments in subsidiaries and part of them are secured.

The collection and concentration of receivables is monitored on an ongoing basis, according to the established policy of the company. For this purpose, the open positions by clients, as well as the received receipts, are periodically reviewed by the financial and accounting department and the management, and an analysis of the unpaid amounts is performed.

The Management follows an internal policy for assessing credit losses. For receivables from related parties and trade receivables the simplified method is applied, as the percentages are determined on the basis of past experience.

As of 30th September, 2022 the Company has written off receivables of BGN 902 thousand. As of 31st December 2021, receivables at the amount of BGN 87 thousand are reported as written off and an BGN 152 are recognized as impairment of receivables.

Liquidity risk

The liquidity risk is expressed in the negative situation that the Company will not be able to meet unconditionally all its obligations, according to their maturity.

It pursues a conservative liquidity management policy, through which it constantly maintains an optimal liquidity reserve of monetary funds and a good ability to finance its business activities.

In order to control the risk, the company monitors the timely payment of the incurred liabilities.

The company monitors and controls the actual and projected cash flows for periods ahead and maintains a balance between the maturity limits of the assets and liabilities of the company. Currently, the maturity and timely execution of payments is monitored by the finance and accounting department, maintaining daily information on available monetary funds and upcoming payments.

Capital risk management

With the capital management the Company aims to create and maintain opportunities for it to continue to operate as a going concern and to ensure the appropriate return on investment of shareholders, and to maintain optimal capital structure, to reduce capital expenses.

The company currently monitors the security and capital structure based on the debt ratio. This ratio is calculated between the net debt capital and the total amount of capital. Net debt capital is defined as the difference between all borrowings (current and non-current) as stated in the statement of financial position and the cash and cash equivalents. The total amount of capital is equal to the equity and net debt capital.

The table below presents the debt ratio based on the capital structure:

NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022

Unless otherwise stated, all amounts are in BGN thousand.

	September 30, 2022	December 31, 2021
Total debt capital, including:	2 358	2 765
Reduced with: cash and cash equivalents	9 313	16 434
Net debt capital	(6 955)	(13 669)
Total equity	25 315	31 471
Total capital	18 360	17 802
Debt ratio	0.00%	0,00%

As the cash is larger than the debt capital, the company has no indebtedness.

10. Fair values

For the purposes of disclosing fair value, the Company determines different classes of assets and liabilities depending on their nature, characteristics and risk and the respective level of the fair value hierarchy specified in item 3.14 from the Notes to the financial statement.

The Company's management has determined that the book values of cash and cash equivalents, receivables from affiliated companies, liabilities to affiliated companies, trade receivables and payables approach their fair values due to the short-term nature of these financial instrument.

The attached table shows the book values and fair values of financial assets and liabilities, including their levels in the fair value hierarchy. Fair value information is not included if the book value is reasonably close to the fair value.

The table below presents the hierarchy of the fair value of the Company's assets and liabilities in accordance with IFRS 13:

	Book value	Level 1	Level 2	Level 3
As of September 30, 2022				
Financial assets				
Long-term trade receivables	1027	-	-	-
Other long - term capital investments	758	758	-	-
Cash and cash in bank	9 313	-	-	-
Receivables from related companies	2 017	-	-	-
Trade receivables	1 036	-	-	-
Total:	14 151	758	-	-
Financial liabilities				
Bank loans	1 687	-	1 687	-
Financial leasing	21	-	-	-
Trade liabilities	41	-	-	-
Other liabilities	569	-	-	-
Total:	2 318	-	1 687	-
As of December 31, 2021				
Financial assets				
	Book value	Level 1	Level 2	Level 3

*NOTES TO THE INDIVIDUAL
FINANCIAL STATEMENTS AS OF 30 SEPTEMBER 2022*

Unless otherwise stated, all amounts are in BGN thousand.

Long term receivables	2 054	-	-	-
Other long - term capital investments	2 624	2 624	-	-
Cash and cash in bank	16 434	-	-	-
Receivables from related companies	1 769	-	-	-
Trade receivables	3 325	-	-	-
Total:	26 206	2 624	-	-

Financial liabilities

Bank loans	1 900	-	1 900	-
Trade liabilities	174	-	-	-
Other liabilities	665	-	-	-
Total:	2 739	-	1 900	-

The fair value of the financial liabilities included in Level 2 in the table above is determined in accordance with the generally accepted valuation model based on discounted cash flows.

11. Events after the end of the reporting period

There are no corrective events or other significant non-corrective events occurred between the date of this individual financial statement and the date of its approval for publication.

In addition to the above on 05.10.2022 the Company has disclosed to the FSC and the Public the following information: Allterco AD announces a 49.8% increase on an annual basis on the consolidated sales revenues of IoT devices and related services to 57.7 million BGN (29.5 million EUR) in the nine months to 2022, based on preliminary data. Sales revenue for Shelly-branded IoT devices increased by 51.0%, amounting to 54.5 million BGN, (27.8 million EUR), followed by revenues from sales of MyKi tracking devices, which increased by 32.5% to 3.2 million BGN (1.6 million EUR).

With these revenues Allterco AD exceeds the budget and forecast for the nine months to 2022. Compared to the nine months to 2021, the Company's growth rate is increasing, in line with management's expectations for an annual growth rate of 43% for 2022.
