AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

As of June 30, 2022, the Company acquired 40,000 own shares, at a price of 19,50 BGN per share, representing 0.22% of the capital.

On June 24.06.2022 the Company announced its intention to acquires 40 000 own shares, representing 0,22% of share capital, though OTC deals. The intention is to use the treasury shares to pay part of the price for the eventual acquisition of the Slovenian IoT company GOAP d.o.o. Nova Gorica (GOAP).

As of June 30, 2022 members of the Board of Directors are:

- Gregor Bieler - Chairman;
- Nikolay Martinov - Deputy Chairman;
- Dimitar Dimitrov - Executive Director and Representative;
- Wolfgang Kirsch - Executive Director and Representative;
- Svetlin Todorov - Member of the Board of Directors and Representative;

The representatives represent the Company together or individually.

1.3. Scope of Activities

The scope of activities of Allterco JSCo includes the acquisition, management, evaluation and sale of participations in Bulgarian and foreign companies; acquisition, management and sale of bonds; acquisition, evaluation and sale of patents, assignment of licenses for use of patents to companies in which the Company participates; financing of companies in which the Company participates.

The scope of activities of group companies includes development, production and trade with IoT (Internet of Things) devices and management of real estate owned by the Group.

1.4. Group structure

As of June 30, 2022 the Group included Allterco JSCo. and the following subsidiaries:

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
 AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Name of the company	June 30 2022	December 31 2021
	Percentage of participation	Percentage of participation
<i>In the country</i>		
<i>ALLTERCO TRADING OOD (Ltd.)</i>	100%	100%
<i>ALLTERCO ROBOTICS EOOD (Solely-owned LLC)</i>	100%	100%
<i>ALLTERCO PROPERTIES EOOD (Solely-owned LLC)</i>	100%	100%
<i>Abroad</i>		
<i>ALLTERCO ROBOTICS INC, USA</i>	100%	100%
<i>ALLTERCO EUROPE GMBH, GERMANY</i>	100%	100%

In the beginning of 2021 Allterco JSCo. acquired a stake in newly established (associated) company in China – Allterco Asia Ltd., with a seat and office in Shenzhen. The registered share capital of the newly registered company is CNY 100 000. Allterco acquired 30% stake (acquisition cost: 7 thousand BGN) and holds an option to acquire additional up to 50% extending its total shareholding up to 80%.

In September 2021 Allterco sold its participation in the capital of 3 Asian subsidiaries.

In December 2021 Allterco JSCo. established a new subsidiary in Germany. The name of the new subsidiary is Allterco Europe GmbH and its registered capital is EUR 500 000 and it is 100% owned by Allterco.

During previous quarter Allterco JSCo increased the capital of its wholly owned subsidiary Allterco Robotics Ltd. The goal of the capital increase is to accelerate the development of new products, to increase the production capabilities and finance the entrance to new markets. The registered capital of Allterco Robotics was increased from BGN 1 500 000 to BGN 7 000 000 by issuing new 5 500 000 shares at par value of BGN 1,00 each. The whole new emission was subscribed by Allterco JSCo and was funded entirely with own funds.

During the reporting period the Board of Directors of Allterco JSCo has approved financing for the operations of the subsidiary Allterco Robotics Inc, USA. with the following parameters: (1) provision of an additional cash contribution of BGN 1,859 thousand (USD 1 million), for a term of 1 year, at an annual interest rate of 1% and (2) a capital increase of USD 500,000.

At the reporting date, the subsidiary had only received an additional cash contribution of BGN 1,859 thousand (USD 1 million). The capital increase is not yet finalized.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

2. Basics of preparation of financial statements and accounting policies

2.1. General framework of financial reporting

The Group maintains its current accounting and prepares its financial statements in accordance with the requirements of the Bulgarian commercial and accounting legislation.

These financial statements have been prepared in accordance with the requirements of the International Accounting Standards, published by the International Accounting Standards Board and adopted by the European Union. As of June 30, 2022, IASs include the International Accounting Standards (IASs), the International Financial Reporting Standards (IFRSs), the Interpretations of the Standing Interpretation Committee and the Interpretations of the IFRS Interpretation Committee, approved by the IAS Committee.

The IAS Committee issues every year the standards and their interpretations, which after the formal approval by the EC, are valid for the year in which they are issued. However, a big part of them is not applicable to the company's business because of the specific issues that are addressed in them.

2.2. Initial application of new and amended IFRSs in force for the current accounting period

2.2.1. Accounting standards applicable for the current reporting period

The management considered all standards and clarifications to the standards, which are applicable to the activities of the Company and which are officially adopted by the EU as of the date of preparation of the current financial statements.

The management reviewed the amendments in the existing accounting standards which are enforceable as of January 1, 2022 and assessed that no changes in the current accounting policy are necessary.

2.2.3. Standards and clarifications issued by IASC awaiting adoption by the EU Commission

<i>Standard or clarification, date of amendment and enforcement</i>	<i>Name of the standard or clarification</i>	<i>Adoption status by EU Commission</i>
Amendments to IAS 1 issued on 23 January 2020 and 15 July 2020, in effect for annual financial periods starting at or after 1 January 2023	Classification of liabilities as current or non-current and classification of assets as current and non-current – postponement of enforcement date	Waiting for a date of adoption
Amendments to IAS 1 issued on 12 February 2021, in effect for annual financial periods starting at or after 1 January 2023	Financial statements presentation and disclosure of accounting policies	Waiting for a date for adoption
Amendments to IAS 8 issued on	Accounting policies, Amendments in	Waiting for a date for

*EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022*

Unless otherwise stated, all amounts are in BGN thousand.

12 February 2021, in effect for annual financial periods starting at or after 1 January 2023	the accounting assessments and mistakes: Definition of accounting assessments	adoption
Amendments to IAS 12, issued on 7 May 2021, in effect for annual financial periods starting at on after 1 January 2023	Corporate profit tax: Deferred tax related to assets and liabilities arising from one deal	Waiting for a date for adoption
IFRS 17 issued on 9 December 2021, in effect for annual financial periods starting at or after 1 January 2023	Insurance contracts: Initial application of IFRS 17 and IFRS 9 – Comparable data	Submitted for adoption by the Commission, expected to be adopted during the first quarter of 2022

2.3. Accounting principles

The consolidated financial statements of the Group have been prepared in accordance with the going concern principle. The latter assumes that the Group will continue to exist in the foreseeable future.

During the last reporting period the continuing COVID-19 pandemic did not cause any negative effect on the business activities of the Group. The military conflict between Russia and Ukraine, which started in February 2022, at this stage, also do not have negative effect on the business of the Group.

The Management has no plans or intentions to sell the business or discontinue the operations, which could significantly change the book value or classification of the assets and liabilities recognized in the financial statements.

The valuation of assets and liabilities and the measurement of income and expenses are carried out in compliance with the principle of historical cost. This principle has been modified in certain cases by revaluing certain assets and / or liabilities to their fair value at December 31 of the r previous year and as of June 30 of the current year, as set out below.

2.4. Functional and reporting currency. Comparative data

Functional and Reporting Currency

The accounting currency for the presentation of the elements of the consolidated financial statements is the Bulgarian Lev (BGN), which is the functional currency of Allterco JSCo.

The data in the elements of the consolidated financial statements and the notes thereto are presented in thousands of BGN, unless explicitly stated otherwise. When presented in the financial statements and the explanatory notes, amounts over BGN 500 are rounded to BGN 1 thousand.

The Group's companies keep their accounting records in the functional currency of the country in which

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

they operate. The effects of exchange rate differences related to the settlement of foreign currency transactions or the accounting of foreign exchange transactions at rates other than those at which they were initially recognized are included in the statement of comprehensive income at the time they occur, are treated as “other operating income and expenses”, except for those related to investments and loans denominated in foreign currency, which are presented as “financial income” and “financial expenses”. Non-monetary assets and liabilities initially denominated in foreign currencies should be translated to the functional currency using the historical exchange rate at the date of the transaction and subsequently not revaluated at the closing exchange rate.

Comparative data

The company presents comparative data for the previous comparative period. When necessary, the comparative data is reclassified (or recalculated) in order to achieve comparability with respect to changes made during the current reporting period.

During the reporting period the following reclassifications have been done in the statements of comprehensive income for the previous period:

- Direct costs were reported as administrative expenses in the previous reporting period.

The effect from the reclassification in the statement of comprehensive income is increase of Cost of Goods Sold with 492 thousand BGN and decrease in administrative expenses with the same amount.

- Sales expenses were reported as administrative expenses in the previous reporting period.

The effect of the reclassification in the statement of comprehensive income is increase in Sales expenses with 964 thousand BGN and decrease of administrative expenses with the same amount.

2.5. Transactions and balances

A transaction in foreign currency is recognized initially in the functional currency by applying the foreign currency exchange rate (spot) between the functional currency and the foreign currency at the time of the transaction or operation.

At each date of financial statement preparation:

- (a) monetary positions, receivables and payables denominated in foreign currency are recalculated

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

into the functional currency using the exchange rate published by the BNB on the last business day of the month of the report;

(b) non-monetary items held at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction, if an exchange rate other than that of the transaction (average monthly, daily or other) is applied; and

(c) non-monetary items held at fair value in a foreign currency are recalculated using the exchange rates at the date when the fair value was determined.

Foreign currency exchange differences are recognized in accordance with IAS 21 the Effects of Changes in Foreign Exchange Rates.

The items of the consolidated statement of financial position and consolidated statement of comprehensive income of foreign companies of the Group, using a functional currency other than Bulgarian lev, are translated into BGN to be included in the consolidated statement of the group as follows

- All monetary and non-monetary assets and liabilities (including comparative information) are recalculated at the BNB closing exchange rate at the date of the relevant statement of financial position. As of June 30, 2022 the exchange rate of BGN to USD was 1,88296 and BGN to NOK was 1,88996 BGN for 10 NOK (As of June 30, 2021 BGN/USD was 1,64577 and BGN/10 NOK was 1,92282);
- The income and expense items of each comprehensive income statement are recalculated at the accounting date at the weighted average exchange rate for the reporting period;
- All exchange rate differences obtained are recognized as other comprehensive income.
- The cumulative amount of these exchange rate differences is presented in a separate component of equity until the foreign operation is released.

2.6. Assumptions

The presentation of financial statements in accordance with International Financial Reporting Standards, accepted by EU, requires the management to make the best estimates, accruals and reasonable assumptions that have an effect on the reported values of assets and liabilities, of income and expenses, and of the disclosure of contingent receivables and liabilities. These estimates, accruals and assumptions are based on the best assessment using the available information at the date of preparation of the financial statements, and therefore future actual results may differ from the amounts presented in the current financial statements.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

2.7. Subsidiaries and associated companies

Subsidiaries are the entities over which Allterco JSCo. exercises control as defined in IFRS 10 Consolidated Financial Statements.

The parent-company (the investor) controls the investee company if it has:

- Rights over the ownership of the subsidiary;
- Rights over the variable returns from its participation in the subsidiary;
- Ability to use its powers over the entity in order to influence the size of return on investment.

Subsidiaries are considered controlled starting from the date on which control is acquired by the Group and they cease to be consolidated on the date when the control have been lost.

Associated company is a company in which the Group has significant influence on decisions regarding operating and financial policies, but without being able to fully control those policies.

2.8. Minority interest

Minority interest is valued at the proportionate share of identifiable net assets at the acquisition date.

2.9. Consolidation

The consolidated financial statements of the Group include the financial statements of the parent company and the subsidiaries. All assets, liabilities, capital, income, expenses and cash flows of the group companies are presented as such as they belong to just one entity.

Subsidiaries are those entities that are controlled by the parent company. Control occurs when the parent company exercises its rights on variable return arising from its participation in the subsidiary's capital and has the ability to influence this return from investment through its power. The consolidated financial statements have been prepared following the same accounting policies with respect to similar transactions and business facts of all companies in the group. All mutual interests, as well as significant internal transactions, balances and unrealized gains in the Group are eliminated and the financial statements are prepared using the full consolidation method. The financial results of operations of the subsidiaries are included in the consolidated financial statements from the date of acquisition of control over them and cease to be consolidated from the date on which such control is lost. When a subsidiary is acquired as a result of an internal group restructuring, its net assets and financial result are included from the beginning of the

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

earliest accounting period presented in the financial statements.

2.10. Definition and assessment of the items in the consolidated financial statements

2.10.1. Revenues

Revenue from sales and operating expenses has been accrued at the time of their occurrence, regardless of cash receipts and payments. The accounting and recognition of revenue and expenses should be carried out in compliance with the requirement for a cause-consequence connection between them.

Revenue is measured at the fair value of the remuneration received or to be received or paid, less any discounts provided.

The Group recognizes revenue when the amount of revenue can be measured reliably, when it is possible for the Group to obtain future economic benefits, and when it meets specific criteria for each of the Group's activities, as specified below.

Amounts collected on behalf of third parties, such as sales taxes and value added tax, are excluded from revenue.

- ***Revenue recognition under contracts with customers***

Revenues in the Group are recognized when the control over the goods and/or services promised in the contract with the customer are transferred to the customer. The control is transferred to the customer upon fulfilment of the contractual obligations by transferring the promised goods and/or rendering the promised services as in general the Group generally controls the goods or services before transferring them to the customer.

The Group recognizes revenue when it meets its obligations under the terms of the contract, by transferring the promised service to the customer. An asset (good or service) is recognized as transferred after the customer obtains control over that asset.

- ***Evaluation of a contract with a customer***

There is a contract with a customer only when upon its entry into force it:

- ✓ it has a commercial nature and motive;
- ✓ the parties have approved it (orally, in writing or on the basis of "established and generally accepted business practice") and have undertaken to fulfil it;

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

- ✓ the rights of each party can be identified in relation to the goods or services to be transferred;
- ✓ payment terms can be identified; and
- ✓ there is a probability that the remuneration to which the company is entitled in the performance of its obligations will be received.

A contract for which one of the above criteria has not yet been met is subject to a new evaluation in each reporting period. Remuneration received under such a contract is recognized as a liability (liability under the contract) in the Statement of financial position until:

- ✓ all criteria for recognition of a contract with a customer are met;
- ✓ the company has fulfilled its obligations and has received all or almost all of the remuneration (which is not refundable); and / or
- ✓ when the contract is terminated and the remuneration received is not refundable.

In the initial evaluation of its contracts with customers, the Company makes an additional analysis and assessment of whether two or more contracts should be considered in their combination and should be reported as one and respectively whether the promised goods and / or services in each individual and / or combined contract must be accounted for as one and / or more performance obligations.

Any promise to transfer goods and / or services that are distinguishable (themselves and in the context of the contract) is accounted for as a single performance obligation.

The Company recognizes revenue for each *individual obligation to perform within an individual contract with a customer* by analyzing the type, term and conditions for each specific contract.

- ***Measurement of revenues under contracts with customers***

The revenue is measured on the basis of the *transaction price* determined for each contract.

The *transaction price* is the amount of the remuneration to which the Company expects to be entitled, except for the amounts collected on behalf of third parties. In determining the transaction price, the Company takes into account the terms of the contract and its usual commercial practices.

- ***Transaction price and payment terms***

The transaction price usually includes a fixed sale price, according to a general or customer price list.

- ***Variable remuneration***

The Variable remuneration is included in the transaction price only to the extent that it is highly probable that no significant adjustment will be made to the amount of revenue recognized cumulatively.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Revenue from services

The company reports revenues from services, complying with the commitments under the contract. Revenues from services are reported upon final completion of the services (by sites) recognized as performed.

Other income / revenues

Other income and revenues are recognized when the right to receive them is established.

The Group companies apply IFRS 15 and the management carefully examines its trade practices for possible changes at the time of revenue recognition. No change in the obligations for performance and the distribution of the price of the contracts and recognition of revenues is needed for the reporting period.

Depending on the nature of the activity and the contracts with the clients, the management has assessed the categories of revenue breakdown and has disclosed them in *Note 4.01*.

2.10.2. Expenses

The expenses of the Group are recognized at the time of their occurrence and on the basis of the accrual and comparability principles. Expenses are recognized when there is a decrease in future economic benefits associated with a decrease in an asset or an increase in a liability that can be measured reliably. Recognition of expenses for the current period is made when revenue is accrued. An expense is recognized immediately in the statement of comprehensive income when the expense does not create future economic benefits or when and to the extent that future economic benefits do not meet the requirements or cease to meet the requirements for recognition of an asset in the statement of financial position. Expenses are accounted for on an accrual basis and are comparable to recognized revenue. They are measured at the fair value of the remuneration paid or pending for payment.

Expenses for future periods shall be deferred for recognition as current expenses in the period in which the obligations under the contracts to which they refer, would be performed.

Financial expenses consist of interest expenses and other direct costs related to loans as well as bank fees and losses from foreign currency exchange.

2.10.3. Property, plant and equipment

Property, plant and equipment (non-current tangible assets) are presented in the financial statements at acquisition cost (cost price) less accumulated depreciation and impairment losses.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Initial evaluation

Upon initial acquisition, property, plant and equipment are evaluated at acquisition cost (cost price), which includes the purchase price, including customs charges and any directly attributable costs of bringing the asset to working condition. The direct costs are as follows: costs of site preparation, costs of initial delivering and handling, installation costs, costs for personnel remuneration fees related to the project, non-refundable taxes, etc.

When acquiring property, plant and equipment on a deferred payment basis, the purchase price is equivalent to the present value of the liability, discounted on the basis of the interest rate on the borrowed resources of the company with a similar maturity and purpose. The difference between the cash price equivalent and the general payment is recognized as interest over the course of the loan unless it is capitalized in accordance with IAS 23.

Evaluation after recognition

The approach chosen by the Group for the subsequent evaluation of property, plant and equipment is the acquisition cost model - less any subsequent depreciation and any accumulated impairment losses.

For all other classes of non-current tangible assets, the company has applied the acquisition cost model.

Depreciation Methods

The Company uses the straight-line method of depreciation of non-current tangible assets. Depreciation of assets begins when they are available for use. The useful life by groups of assets is determined in accordance with: physical wear and tear, specifics of the equipment, future intentions for use and actual obsolescence.

The useful life by classes of assets is as follows:

Vehicles	4 years
Computer equipment	2-5 years
Office equipment	3- 6,67 years
Other non-current tangible assets	6,67 years

The determined useful life of non-current tangible assets is reviewed at the end of each year and, if significant deviations are found against future expectations for the useful life of the assets, it is adjusted prospectively.

Unless otherwise stated, all amounts are in BGN thousand.

Write off of non-current tangible assets

The book value of an item of property, plant and equipment is written off: when it is sold, when no other economic benefits are expected from its use, or when it is identified as missing.

Profits or losses arising on the write off of an item of property, plant and equipment are included in the statement of comprehensive income when the asset is written off (unless IAS 17 requires otherwise in a sale and leaseback). Profits and losses on disposals of non-current assets are determined by deducting the book value of the asset and the selling expenses from the proceeds from the sale (disposal). They are stated net, to "Other operating income" in the statement of comprehensive income.

The receivable on disposal of an asset of property, plant and equipment is initially recognized at fair value.

2.10.4. Intangible assets

Intangible assets are presented in the financial statements at acquisition price (cost price) less accumulated depreciation and impairment losses.

The Group applies a straight-line method of depreciation of intangible assets with a useful life of 2 years for the software products, 6.67 years for the software platform, 3 years for an ISO certificate.

The book value of the intangible assets is reviewed for impairment when there are events or changes in circumstances that indicate that the book value amount could exceed their recoverable amount. Then the impairment is included as an expense in the statement of comprehensive income.

Initial assessment

Externally generated intangible assets on their acquisition are evaluated at acquisition price, which includes purchase price, import duties, non-refundable taxes and expenses of preparing the asset for its intended use. The direct expenses are: expenses for preparation of the site (the place where the asset will be used), expenses for initial delivery, installation expenses, expenses for fees of persons related to the project, non-refundable taxes, etc.

Intangible assets are recognized if they meet the definition of intangible assets set out in IAS 38 Intangible Assets, namely:

- Meets the definition of an intangible asset;
- Upon its acquisition it can be reliably assessed;
- Economic benefits are expected from the use of the asset, as evidenced by the availability or plan

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

to obtain sufficient resources to enable the enterprise to obtain the expected economic benefits; the ability to effectively perform its functional role in accordance with the intention of the enterprise regarding its use or there is a clearly defined and specified technical feasibility.

Subsequent expenses

Expenses related to the maintenance of initially established standard efficiency, incurred after the commissioning of intangible non-current assets, are recognized as current at the time of their implementation. The book value of the intangible asset is adjusted to the extent of the expenses leading to the increase of the expected future economic benefits associated with the use of an intangible asset over the initially determined standard efficiency.

2.10.5. Goodwill

Goodwill is the excess of purchase prices over the fair value of identifiable net assets of company acquires as of the date of acquisition (business combination). Initially, it is presented in the consolidated financial statements at acquisition cost and subsequently it is presented at acquisition cost minus impairment. Goodwill is not amortized.

The goodwill generated as a result of the acquisition of a daughter company is presented in the consolidated statement of financial position as a part of non-current assets and the goodwill generated as a result of acquisition of joint-ventures or associated companies is included in the total value of investment and is reported as “investments in associated companies”.

The goodwill associated with the acquisition of associated companies is tested as part of the total value of the investment. The goodwill associated with the acquisition of daughter companies is tested for impairment at least one per year. Losses recognized as a result of impairment of goodwill are not reversible. Profit or loss from the sale of a daughter company include also book value of goodwill associated with this daughter company.

Any goodwill amount recognized in the financial statements is attributable to a certain cash generating object at the time a business combination is completed, and this object is applied when tests for impairment are conducted. For determining the cash-generating objects, are considered only objects that are expected to generate future economic benefits and that are subject to the business combination, which generated the goodwill.

Losses from impairment of goodwill are presented in the statements of comprehensive income as part of

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

“Impairment of non-current assets.

2.10.6. Other long-term capital investments

Other long-term financial investments are non-derivative financial assets in the form of shares and participation of other companies (minority interest) held with a long-term perspective.

Initial valuation

Capital investments are initially recognized at acquisition cost, which is the fair value paid, including direct acquisition cost of the investment (the financial asset). All purchases and sales of capital investments are recognized on the “trading date” of the transaction, i.e., the date on which the company commits to purchase or sell the asset.

Subsequent evaluation

Capital investments owned by the Group are subsequently evaluated at fair value. The results of the subsequent evaluation to fair value are presented in the statement of comprehensive income (in other components of comprehensive income) and respectively in the reserve related to financial assets at fair value, through other comprehensive income. These results are transferred to retained earnings on disposal (sale) of the respective investment.

2.10.7. Investments in Associated companies

Investments in associated companies are reported following the capital method. The share of the Group in the comprehensive income of an associated company is shown on one line in the consolidated statements in a way that the amount of investment reflects the share of the Group in the net assets of the associated company as of the date of the financial statements. The Group recognizes its share in the losses of an associated company up to the amount of its investment, including all internal loans extended, unless it has undertaken an obligation to pay such liabilities on behalf of the associated company.

As of 31.03.2022 the Group reports a share in the profit of associated companies at the amount of BGN 6 thousand. The balance sheet amount of investments in associated companies was increased with the amount of reported profit.

2.10.8. Non-current assets held for sale

Non-current assets are classified as held for sale if their book value will be recovered through sale rather than through continuing use in the Company's operations. This condition is considered to exist only when

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

the sale is highly secure and the relevant non-current assets are available for immediate sale in their present condition.

Non-current assets classified as held for sale are measured at the lower value between the fair value and the book value less the costs to sell.

2.10.9. Inventories

Inventories are accounted at the lower of the two following values: acquisition cost (cost price) and net realizable value.

The costs incurred to bring an inventory to its present condition and location are included in the cost of acquisition (cost) as follows:

- Materials - the purchase price and all related costs of delivery;
- Goods - the purchase price and all related costs of delivery, customs duties, transport costs, non-recoverable taxes and other costs incurred in order to bring the goods in ready for use state.

In the use (sale) of inventory, the first-in-first-out method is used.

2.10.10. Financial instruments

Financial assets

A financial instrument is any contract that gives rise to both a financial asset in one entity and a financial liability or equity instrument in another enterprise.

Initial recognition, classification and evaluation

Upon initial recognition, financial assets are classified into three groups, according to which they are subsequently assessed at depreciated value, at fair value through other comprehensive income and at fair value through profit or loss.

The classification of financial assets upon initial recognition depends on the characteristics of the contractual cash flows of the respective financial asset and the business model of the Company for its management.

The business model of the Company for management of financial assets reflects how the Group manages its financial assets to generate cash flows. The business model determines whether cash flows are the result of contractual cash flows, the sale of financial assets, or both.

Evaluation

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

The Group initially presents financial assets at fair value, and in the case of financial assets that are not carried at fair value through profit or loss, the direct transaction costs are added. An exception is trade receivables that do not contain a material financing component - they are estimated based on the transaction price determined in accordance with IFRS 15 and the invoices issued.

Subsequent evaluation

For the purposes of Subsequent evaluation, financial assets are classified into four categories:

- Debt instruments presented at depreciated value
- Debt instruments presented at fair value through other comprehensive income (reclassified to profit or loss);
- Capital instruments presented at fair value through other comprehensive income (without reclassification in profit or loss);
- Financial assets (debt instruments, capital instruments and derivatives) presented at fair value through profit or loss.

During the current period, the Group reports financial assets in one of these categories - financial assets at depreciated value.

Financial assets at depreciated value (debt instruments)

This category is the most significant for the Group.

The Group measures financial assets at depreciated value when both of the following conditions are satisfied:

- the financial asset is held and used within a business model that aims to hold the asset in order to obtain contractual cash flows from it, and
- the terms of the contract of the financial asset generate cash flows at specific dates, which represent only principal payments and interest on the outstanding principal.

The management of the Group has assessed the financial assets representing cash in banks, interest-bearing receivables from related companies, trade receivables and other receivables (i.e., trade loans receivables and others) are held by the Group in order to obtain the agreed cash flows and they are expected to result in cash flows that represent solely principal and interest payments under the business model applied.

Financial assets at depreciated value are subsequently measured using the effective interest rate method (EIR). They are subject to impairment. Profits and losses are recognized in the statement of comprehensive

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

income (in profit or loss for the year) when the asset is written off, modified or impaired.

Write off

A financial asset is written off in the statement of financial position of the Group when:

- the rights to obtain cash flows from the asset have expired, or
- the rights to receive cash flows from the asset have been transferred or the Group has assumed an obligation to pay in full the received cash flows, without significant delay, to a third party through an agreement for transfer. In this case, the Group recognizes also the liability associated with it. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement, which is in the form of a guarantee on the transferred asset, is measured at the lower of the two values: the initial book value of the asset and the maximum amount of consideration that the Group may be required to pay.

Impairment of financial assets

The Group recognizes an adjustment (provision for impairment) for expected credit losses on all debt instruments that are not accounted at fair value through profit or loss. Expected credit losses are calculated as the difference between the contractual cash flows payable under the terms of the contract and all the cash flows that the Group expects to receive discounted at the initial effective interest rate.

At each accounting date, the Group determines whether the debt instrument is assessed as such with low credit risk using all reasonable and well-grounded information that is available without incurring unnecessary expense or effort. In making this assessment, the Group reviews the internal credit rating of the debt instrument. In addition, the Group assesses whether there is a significant increase in credit risk when contractual payments are overdue for more than 30 days.

The Group considers a financial instrument as default when contractual payments are overdue for more than 60 days. However, in certain cases, it may treat a financial asset as default when internal or external information provides an indication that it is unlikely that the Group will receive the full amount of the outstanding contractual amounts before taking into account any credit improvements held by it. Financial assets are written off when there is no reasonable expectation for collection of contractual cash flows.

To calculate the expected credit losses of *trade receivables and assets under contracts with customers*, the Group has chosen and applies a simplified matrix-based approach for calculating expected credit losses and

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

does not track subsequent changes in their credit risk. In this approach, it recognizes an adjustment (provision for impairment) based on the expected credit loss for the entire receivable period at each reporting date. The Group has developed and applies a provisioning matrix based on historical experience with respect to credit losses, adjusted for prognostic factors, specific for the debtors and the economic environment, and correlated with the percentage of credit losses. The collectability of receivables from related companies are assessed on individual basis considering factors as financial needs of each related company and the business development plan for the next periods.

Financial assets are written-off when there is no reasonable expectation of collection of contractual cash flows.

Financial liabilities*Initial recognition, classification and evaluation*

Initially, all financial liabilities are recognized at fair value, and in the case of loans and borrowings and trade and other payables, the net of directly related transaction costs.

Subsequent evaluation

Subsequent evaluation of financial liabilities depends on their classification as described below.

Financial liabilities evaluated at depreciation value

This category is essential for the Group. Subsequent to their initial recognition, the Group evaluates interest-bearing loans and borrowings at depreciation value using the effective interest method. Profits and losses are recognized in the statement of comprehensive income (in profit or loss for the year) when the corresponding financial liability is derecognized, as well as through depreciation at the effective interest rate method.

Depreciation value is calculated by taking into account any discounts or acquisition premiums, as well as fees or expenses, which are an integral part of the effective interest rate. Depreciation is included as a “financial expense” in the statement of comprehensive income (in profit or loss for the year).

Write off

Financial liabilities are written off when the liability is repaid, terminated or expires. When an existing financial liability is replaced by another of the same creditor under substantially different conditions, or the terms of an existing liability are substantially altered, such exchange or modification shall be treated as

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

derecognition of the original liability and recognition of a new one. The difference with the book value of a financial liability settled or transferred to another party in cash and/or non-monetary assets is recognized in profit or loss for the period.

2.10.11. Cash and cash equivalent

Cash includes cash on hand and amounts in current accounts, and cash equivalents are short-term deposits with banks whose original maturity is less than 3 months.

The cash flow statement is presented using the direct method.

Cash and cash equivalents are subsequently presented at depreciated value, without any accumulated adjustments for expected credit losses.

2.10.12. Leasing

Operating lease

At the inception of the contract, the company assesses whether the contract represents or contains a lease. A contract represents or contains elements of a lease if, under that contract, the right to control the use of an asset for a specified period of time is transferred in exchange for consideration. The assessment includes an assessment of the following factors:

- Whether the contract involves the use of an identified asset, this may be stated explicitly or by default, and must be physically identifiable or must represent essentially the entire capacity of a physically separate asset. If the supplier has a substantial right of replacement, then the asset is not identified;
- Whether the company is entitled to receive substantially all the economic benefits from the use of the asset throughout the useful life; and
- Whether the company has the right to manage the use of the asset. The company has this right when it has decision-making rights concerning the change in the manner and purpose of using the asset. In the rare cases where it is predetermined how and for what purpose the asset will be used, the company has the right to manage the use of the asset if:
 - ✓ The company has the right to operate the asset; or
 - ✓ The company has designed the asset in a way that determines in advance how and for what purpose it will be used

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Financial leasing

The lease contract under which all risks and economic benefit of ownership of the asset are transferred to the company of the Group is classified as a financial leasing and the leased asset is capitalized in the consolidated statement of financial position of the lessee and presented as property, plant and equipment. Upon initial recognition, leased assets are accounted at the lower value of the following two: their current fair value or the present value of the minimum lease payments. The minimum lease payments are apportioned between the finance expenses (interest) and the reduction of the lease liability (principal). Financial expenses are allocated to each period over the lease term so that a constant interest rate is reached on the remaining outstanding portion of the principal under the lease liability. Interest expenses are included in the consolidated statement of comprehensive income as "Financial expenses".

Assets acquired under a financial leasing are depreciated based on the useful life of the asset and within the lease term.

2.10.13.Provisions

Provisions are recognized when the Group has a present (constructive or legal) obligation as a result of a past event, and it is probable that an outflow of resources will be required to settle the obligation. Provisions are estimated on the basis of the best estimate of the management at the date of preparation of the financial statements for the expenses necessary for the settlement of the respective obligation. The estimate is discounted when the maturity of the liability is long-term. When it is expected that part of the resources that will be used to settle the obligation will be recovered from a third party, the company recognizes a receivable, if there is a high degree of certainty of its receipt, its value can be reliably determined as income (credit) on the same position in the Statement of Comprehensive Income, where the provision itself is presented.

The Group accrues provisions for guarantee service of devices sold. The provision is calculated on the basis of best estimate of management about the expected expenses, which the Group will incur in case of guarantee events and based on the past experience about the sold products/ services.

Unless otherwise stated, all amounts are in BGN thousand.

2.10.14. Liabilities to employees

Defined contribution plans

The government of the Republic of Bulgaria undertakes the liability to ensure pension payments on the basis of defined contribution plans. The liability of the Company to pay the amounts booked under the defined contribution plans for the employees is recognized in the statement of comprehensive income at the time of occurrence of the liability.

Paid annual leave

The Group recognizes as a liability undiscounted amount of estimated cost of annual paid leave, which is expected to be paid to employees in return to their labor for the past reporting period.

Defined income for retirement

In compliance with the Labor Code, when a labor contract of an employee that obtained the right for pension is terminated, the Company pays a compensation at the amount of two gross monthly salaries, if the employee worked for the Company less than 10 years, or six gross monthly salaries if the employee worked for the Company more than 10 years. The Group estimates that the amount is not significant and therefore it is not included in the financial report.

2.10.15. Share capital

The Group has adopted the financial concept of maintaining the capital. The financial capital maintaining is assessed in nominal monetary units. Profit for the reporting period is considered to be acquired only if the total equity amount at the end of the period exceeds the amount in the beginning of the period, after deducting the distributions to owners or their investments in capital during the period.

Allterco JSCo is a joint-stock company and is obliged to register in the Commercial Register its statutory share capital, which shall serve as a security for its creditors. The shareholders are responsible for the liabilities of the mother-company up to the amount of their shareholding in the capital and may claim the return of that holding only in case of bankruptcy or liquidation proceedings. The mother-company reports its registered capital at par value of the number of shares registered.

Equity is the residual value of an entity's assets after deducting all its liabilities. This includes:

Registered capital – it is presented in the Statement of financial position according to the number of issued

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

shares with nominal value of each share.

Financial result – it is formed as the difference between the income and expenses accrued for it. This includes:

- a) retained earnings;
- b) uncovered loss;
- c) the net profit or loss for the current year, which is presented in the statement of financial position after deduction of tax expense due.

The Equity is decreased by the dividends paid to the shareholders during the period in which they are distributed (voted by the General Meeting).

In accordance with the requirements of the Commercial Law and the Statute of Allterco JSCo., the company is obliged to form reserves at the expense of:

- at least one-tenth of the annual profit, until the funds accumulated reach 25 per cent of the share capital;
- the funds received above the nominal value of the shares issued (premium reserve);

Treasury shares are reported in the statements of financial position at acquisition cost, which is used to decrease the equity of the Group. The profit and losses from the sale of treasury shares are reported in the equity of the Group.

During the past reporting periods the company made payments to the employees of its Bulgarian subsidiaries in shares.

The payment in shares against labor services is made with shares of the mother-company. The equity instruments are valued at fair value as of the date of share transfer. The expense related to the payment in shares is recognized for the period in which the labor services were rendered.

Reserve from translation of financial statement of foreign operations - arises from the net effects of foreign currency conversion of the subsidiaries' financial statements from their functional currencies into Bulgarian levs for the purpose of consolidation.

Other comprehensive income is formed by the difference between previous book value of long-term financial assets reported at fair value and the fair value of such assets as of the date of the report.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

2.10.16. Income tax expenses

Income tax expense represents the sum of the current income taxes and the tax effect on temporary tax differences. The current income tax is determined in accordance with the tax legislation of the respective country. The nominal corporate profit tax rate in Bulgaria for 2021 and 2022 is 10%.

The foreign daughter companies are subject to corporate profit tax in accordance with the local legislation.

The applicable tax rates are as follows:

Country	Nominal tax rate	
	2022	2021
Germany	15,825%	15,825%
USA	15-35%	15-35 %
Singapore	-	17 %
Malaysia	-	Up to MYR 500 000 - 20% and for the excess - 25%
Thailand	-	20 %

Deferred tax assets and / or liabilities are the amounts of recoverable and payable income taxes for future periods in respect of deductible and taxable temporary tax differences.

Temporary tax differences are established by comparing the book value of an asset or liability presented in the Statement of financial position with its tax base when applying the tax rules.

Deferred income taxes are calculated using the balance sheet liability method. Deferred tax liabilities are calculated and recognized for all taxable temporary differences, while deferred tax assets are recognized only if it is probable that they will be recovered and if the company will be able to generate sufficient profit in the future from which they to be deducted.

The effect of recognizing the deferred tax assets and / or liabilities is reflected where the effect of the event that gave rise to them is presented.

For events that affect the statement of profit or loss and other comprehensive income, the effect of deferred tax assets and liabilities is also recognized in the statement of comprehensive income.

For events that are initially reported in equity (revaluation reserve) and deferred tax assets and liabilities are recognized at the expense of equity.

In the Statement of financial position, deferred tax assets and / or liabilities are presented as compensation, as they are subject to a single taxation regime.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

As of June 30, 2022 the Group recognize deferred corporate profit taxes only for the Bulgarian companies and they are estimated using 10% rate, which remains unchanged for 2023.

2.10.17. Earnings per share

The basic earnings per share are calculated by dividing the net profit or loss for the period that is subject to distribution among shareholders of ordinary shares, by the average weighted number of ordinary shares held during the period.

The weighted average number of shares represents the number of ordinary shares hold in the beginning of the period, adjusted by the number of repurchased ordinary shares and the new issued shares during the period multiplied by a time-weighting factor. This factor represents the number of days in which specific shares have been held relative to the total number of days in the period.

Earning of shares with reduced value should not be calculated because there are no shares with reduced value issued.

2.10.18. Judgments that are crucial in applying accounting policies of the Group.***Key high uncertainty estimates and assumptions.***

In the process of applying accounting policies, the management of the Group makes judgments that have a material effect on these financial statements. Such judgments by definition are rarely equal to actual results.

As a result of their nature, they are subject to constant review and updating and include historical experience and other factors as expectations for future events that management believes are reasonable in the current circumstances.

The estimates and assumptions that carry a significant risk of a material adjustment in the carrying amounts of assets and liabilities in the next financial year are set out below.

Useful life of property, plant and equipment and intangible assets

The financial statements of property, plant and equipment and intangible assets include the use of estimates of their useful lives and carrying values, which are based on judgments made by the management of the Group.

Impairment of receivables

The Management estimates the amount and timing of expected future cash flows related to receivables based

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

on experience in current circumstances in the following groups: individual accounts, households and other small consumers and legal receivables. Due to the inherent uncertainty of this assessment, the actual results may differ from those expected. The management of the Group reviews the estimates from previous years against the actual results from the previous year.

In connection with the implementation of IFRS 9 Financial Instruments, the Group have used their accumulated experience in the area of credit losses, and have taken into account current conditions and their forecasts to estimate the expected credit losses on their trade receivables.

2.10.19. Fair values

Fair value is the price that could be obtained from the sale of an asset or could be paid for the transfer of a liability in the ordinary course of trade between market participants at the date of assessment (starting price). Fair value assessment is based on the assumption that the transaction to sell an asset or transfer a liability has been carried out:

- on the principal market of the respective asset or liability, or
- in the absence of a principal market, on the most advantageous market for the asset or liability.

The principal or the most advantageous market should be accessible for the Company.

The fair value of an asset or liability is estimated by making the assumptions that market participants would make when establishing the price of the asset or liability, assuming that they act in their best economic interest.

All assets and liabilities that are measured at fair value or for which fair value disclosure is required in the financial statements, are grouped into categories according to the fair value hierarchy, as described below, based on the lowest level of input data used, which has a significant impact on fair value measurement in general:

- Level 1 - quoted (unadjusted) prices in active markets for identical assets or liabilities are used
- Level 2 - appraisal methods are applied in which the lowest level of used input data essential for fair value assessment have been observed either directly or indirectly
- Level 3 - appraisal techniques are used where the lowest level of used input data essential for fair value assessment are unobserved

For the assets and liabilities that are regularly evaluated at fair value the Company shall review their categorization at the appropriate level of the fair value hierarchy (based on the lowest level of used input data, that have a significant impact on the fair value evaluation as a whole) to the end of the reporting period and

3.09. Inventories

	June 30, 2022	December 31, 2021
Goods	6 315	3 900
Goods in transit	3 246	979
Supplies	1 476	2 227
Materials	338	454
Total:	11 375	7 560

As of June 30, 2022 in the consolidated statement of financial position are presented:

- Components for production of devices at the amount of 1 476 thousand BGN, which were ordered by the Group and purchased by the factories that produce devices for the Group. The components are available at the warehouse of the factories and according to the agreements the Group has ownership rights over them
- Goods in transit, which are not in the warehouses of the Group yet but which are owned by the Group on the basis of purchase agreements

The Group policy is to try to maintain optimal quantity of goods equal to a several months forecast of sales. The management of the Group expects that in the near future the level of inventories will continue to increase as a consequence of increasing sales as well as a result of increasing deficit of certain electronic components necessary for the production of devices.

Total other liabilities	<u>2 540</u>	<u>1 026</u>

The general meeting of shareholders held on June 27, 2022 decided on distribution of dividend at the amount of 1 799 999.90 BGN (0,10 NBGN per share).

3.21. Registered capital

Allterco JSCo was registered in 2010. The registered capital of the Company as of June 30, 2022 amounts to BGN 17,999,999 (seventeen million nine hundred ninety-nine thousand nine hundred ninety-nine) and is distributed in 17,999,999 (seventeen million nine hundred ninety-nine thousand nine hundred ninety-nine) ordinary registered shares with a nominal value of BGN 1 each. The registered capital is fully paid in four installments:

The first issue was made upon the establishment of the Company in the form of a non-monetary contribution in the amount of BGN 50 000, which had as its subject ordinary registered voting shares of the capital of Teravoice AD.

In 2010 a second non-monetary contribution was made in the amount of BGN 5 438 000, which had as its subject shares from the capital of Tera Communications AD.

At the end of 2015, a new issue of 8,012,000 (eight million and twelve thousand) ordinary registered voting shares was issued, with a nominal value of BGN 1 (one) each.

At the end of 2016 the capital of ALLTERCO JSCo was increased with a new issue in the amount of 1,500,000 (one million and five hundred thousand) shares on the basis of a successful initial public offering, according to the Prospectus for public offering of shares, confirmed by the Financial Supervision Commission with Decision № 487 – E of July 08, 2016 entered in the Commercial Register under No.20161108100414 of November 08, 2016.

In 2020 the capital of the Company was increased by cash contributions in the total amount of 2,999,999 (two million nine hundred ninety-nine thousand nine hundred and ninety-nine) against 2,999,999 (two million nine hundred ninety-nine thousand nine hundred and ninety-nine) subscribed and paid dematerialized ordinary registered voting shares with a nominal value of BGN 1 as a result of a procedure for Public Offering of a new issue of shares. The public offering of shares from the capital increase of

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
 AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Allterco JSCo was carried out in the period September 28, 2020 – October 30, 2020 on the basis of a Prospectus, together with the supplements to it, confirmed by the Financial Supervision Commission with Decision № 148- F of February 18, 2020, Decision № 405-E of June 11, 2020, Decision № 601-E of August 13, 2020 and Decision № 791-E of October 29, 2020.

As of June 30, 2022 the shareholders in the company are:

Name	Number of shares:	% in the capital
Svetlin Todorov	5 847 120	32.48%
Dimitar Todorov	5 847 120	32.48%
Persons holding 5% of the capital		
Other physical persons and legal entities	6 305 759	35.04%
Total	17 999 999	100.00%

As of June 30, 2022 the company owns 40 000 treasury shares.

3.22. Retained earnings

	June 30, 2022	December 31, 2021
Opening balance	39 394	26 938
Net profit	6 338	15 962
Distribution of dividends	(1 800)	(3 600)
Change due to sale of subsidiaries	-	390
Change in minority interest		(294)
Other movements	5	-
Closing balance at the end of the period	43 937	39 394

3.23. Reserves

	June 30, 2022	December 31, 2021
Opening balance	1 800	1 500
Reserve from issue of shares	-	300
Balance at the end of the period	1 800	1 800

3.24. Reserve from issue of shares

As of June 30 2022, the reserves from issue of shares are at the amount of 5 403 thousand BGN. They are formed by the excess of share price of newly issued shares during 2020 over the par value of shares. The

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

6. Transactions with related parties

During the reporting period the Group did not engage in transactions with its shareholders or entities, which could be considered as related parties.

The Company did not engage in deals with related or daughter companies that are not part of its ordinary scope of business or which significantly differ from the market terms of business. The deals with group companies had been eliminated for the purposes of consolidation.

The companies included in the Group are disclosed in item 1.4.

Key management

During the reporting period the members of the board of directors of Allterco received remuneration at the total amount of BGN 245 thousand. The remuneration paid was in compliance with the approved remunerations policy and the changes made in the number and the members of the Board of Director approved by the extraordinary shareholder meeting held on April 8, 2022.

7. Financial instruments by category

The accounting policies for financial instruments are applied to the items listed below

Structure of financial assets and liabilities by categories is as follows:

<i>Financial assets according to the Statement of financial position</i>	June 30, 2022				Total
	Cash	Financial assets reported at depreciated value	Financial assets reported at fair value through other comprehensive income	Financial assets reported at fair value through profit or loss

8. Financial risk management

In the course of their normal business, the Group companies may be exposed to various financial risks, the most significant of which are: market risk (currency risk, risk of changes in fair value and price risk), credit

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

risk, liquidity risk and interest rate risk. The general financial risk management is focused on forecasting the changes in the financial markets to minimize potential adverse effects on financial performance. Financial risks are currently identified, measured and monitored through various control mechanisms to determine adequate measures and to avoid unjustified exposure to any potential financial risk.

Financial risk management is an ongoing process directly supervised by the management of the Group and financial experts. It is carried in accordance with a policy established by the Board of Directors of the Parent-company, which has developed the basic principles of general financial risk management. On the basis of those principals specific procedures for managing the individual specific financial risks are defined.

The various types of financial risks to which Group companies are exposed in the course of their business operations are described below, as well as the approach taken to mitigate them.

Market Risk

a. Currency risk

The Group companies carry out their transactions in Bulgaria, some in the European Union and others in third countries (Asia and USA). The biggest portion of supplies made by the Group companies are in Bulgarian lev (BGN), Euro and US dollars. In order to control the currency risk, a system for planning the supplies from countries inside and outside the European Union is used, as well as procedures for periodic monitoring of movements in exchange rates of foreign currencies and control of forthcoming payments.

The tables below summarize the exposure to currency exchange rates:

June 30, 2022	in EUR	in USD	In other foreign currency	In BGN	Total
	BGN'000	BGN'000	BGN'000	BGN'000	BGN'000

TOTAL LIABILITIES	2 905	130	-	1 339	4 374

Currency sensitivity analysis

The Group companies are not exposed to foreign currency risk with respect to their euro transactions.

Currency risk is associated mainly to payments in US dollars and Norwegian krone (NOK). As of June 30, 2022, 10.7% of the Group's current financial assets are in EUR 63.8%, in USD and 1.5% in NOK.

b. Price risk

The Group companies are exposed to a specific price risk with respect to the prices of the services provided and goods sold. Minimizing the price risk of negative changes in prices is achieved by periodically analyzing and renegotiating contractual terms in order to update prices in the light of market changes.

Allterco JSCo. owns shares of Link Mobility Group that are traded on a regulated market. During 2021 and the first half of 2022 the Company sold part of its shares. The remaining shares are exposed to price risk.

Risk of interest-bearing cash flows

There is no significant concentration of interest-bearing assets in the Group companies, except for loans granted and free cash on current accounts with banks. For this reason, the operating cash flows are to a great extent independent of changes in market interest rates.

At the same time, the cash outflows of the Group companies for the reporting period are exposed to interest rate risk due to the use of bank loans in EUR agreed at a variable interest rate.

Cash in current accounts with banks is subject to interest at interest rates according to the tariffs of the

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

respective banks.

The exposure of the Group companies to changes in market interest rates is constantly monitored and analyzed. Different scenarios of refinancing, renewal of existing interest rates and alternative financing are simulated. The calculations cover significant interest-bearing positions.

Credit Risk

The financial assets of the Group companies are concentrated mainly in two groups - cash (cash on hand

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

and in bank accounts) and receivables from clients.

Credit risk is basically the risk that the customers of the Group companies will not be able to pay the due amounts in full and in the usual terms. Receivables from customers are presented in the consolidated statement of financial position at fair value. An impairment for doubtful and difficult-to-collect receivables has been accrued, based on previous experience with events leading to losses from uncollectability.

The Group companies do not have a significant concentration of credit risk. Their policy is to negotiate a credit period longer than 60 days only with customers that have a long trading history and cooperation with the Group companies. Payments from customers are made by bank transfers.

Significant part of Group's revenue is generated by mobile operators or other client, which in most cases are large companies with very good credit ratings.

The collectability and concentration of trade receivables is monitored on an ongoing basis, in accordance with the established policy of the Group companies. For this purpose, regularly the Finance and Accounting Departments review the open positions by customers and receipts, and make an analysis of outstanding amounts.

As of June 30, 2022 cash and banks transfers are allocated to several banks, which mitigates the risk related to cash and cash equivalents exposure.

Liquidity Risk

Liquidity risk is the risk that the companies face difficulties in meeting their financial obligations. Part of the Group customers are mobile operators or other big companies that have a very good credit rating and meet their payment deadlines.

The Group companies maintain a conservative liquidity management policy aimed at constantly maintaining an optimum cash reserve and the ability to finance their business. They also use some borrowed credit resources.

To control liquidity risk, the Group companies control the timely payment of liabilities in accordance with the agreed payment terms with each client.

The Group companies monitor and control the actual and forecasted cash flows and try to match the maturities of assets and liabilities. On an ongoing basis the maturity and timely payment are monitored by accounting department and daily information on available cash and the obligations for future payments is

Capital risk management

With the capital management the Parent Company aims to create and maintain the ability for continuous operations (going concern company) and to ensure the appropriate return on investment to shareholders, as well as to maintain optimal capital structure in order to reduce capital costs.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2022

Unless otherwise stated, all amounts are in BGN thousand.

Allterco JSCo monitors its capital structure using the debt ratio. It is calculated as the ratio between the net debt capital and the total amount of capital. Net debt is defined as the difference between all borrowings (current and non-current) as stated in the consolidated statement of financial position and cash and cash equivalents. The total amount of capital is equal to the equity and the net debt capital.

The table below presents the debt ratios based on the capital structure as of:

	June 30, 2022	December 31, 2021
Total debt capital, incl.:	7 755	6 833
- Bank loans	2 371	2 579
- Lease liabilities	265	138
Reduced by cash and cash equivalents	28 154	30 541
Net debt capital	(20 399)	(23 708)
Total equity	68 191	65 540
Total capital	47 792	41 832
Ratios of indebtedness	0.00%	0.00%

The Group is not in debt for the reporting periods, as cash exceeds the total debt capital.

9. Fair value

Usually, external independent appraisers are used for the assessment of fair value of significant assets. The need of external appraisers is assessed annually by the management of the Company. External appraisers are chosen based on their professional experience, qualities and reputation.

The Group's policy is to disclose in its financial statements the fair value of financial assets and liabilities for which information about market prices is available.

For the purpose of fair value disclosure, the Company determines different classes of assets and liabilities, depending on their nature, characteristics and risk, and on the relevant level in the fair value hierarchy set out in Significant Accounting Policies.

The Company's management has estimated that the fair values of cash and cash equivalents, trade receivables, trade payables, finance lease and bank loans are close to their book values due to the short-term nature of these instruments and their timely payment over time.

The table below shows the book value and fair value of financial assets and liabilities, including their levels in the value hierarchy. Fair value information is not presented if the book value is considered reasonably equal to the fair value.

EXPLANATORY NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

10. Events after the end of reporting period

On 5th of July the Company has announced to the FSC and to the Public the following information: Herewith and within the legally established term we inform you that the following notice were received at the office of Allterco JSCo: Notification under Art. 19, para. 1 of Regulation (EU) № 596/2014 of the European Parliament and of the Council from IMPETUS CAPITAL OOD, in its capacity as a person closely associated with a person discharging managerial responsibilities and namely – Nikolay Angelov Martinov – member of the Board of Directors of Allterco JSCo, of a transaction conducted by IMPETUS CAPITAL OOD and on the own account of this entity as follows: pledge of 162 000 shares of Allterco JSCo, (ISIN BG1100003166) on 30.06.2022 outside the regulated market.

The transaction is not linked to the exercise of share option programs.

On 21st of July has been set the start date for payment of the dividend voted on the regular annual general meeting of shareholders - June 2022

After the end of the reporting period, on 29.07.2022 Allterco AD concluded with the four owners of the capital of GOAP d.o.o. ("GOAP") (one legal and three individual persons) a binding preliminary agreement (Term Sheet) on the main terms and conditions for the acquisition of the Slovenian IoT provider, as follow:

Phase 1: Acquisition of 60% of GOAP's capital for the amount of 2 million EUR under the terms of SPA/Share Purchase Agreement).

Phase 2: The remaining 40% of GOAP's capital belonging to the three owners – individuals – it will be subject to *call* and *put* options under which Allterco will have a *call* option to acquire and sellers – *put* option to transfer the remaining shares of the capital. These options shall be carried out at the discretion of the holder of the relevant option, in one or more steps and against a price that varies in a predetermined range, depending on predefined measurable GOAP results within a predetermined period of time. Within a predetermined time period if GOAP's results do not reach a predetermined threshold, then the *put* option cannot be used, but Allterco will retain its rights under the *call* option, executable against a predetermined minimum price. The specific terms of option agreements, including price, are subject to further negotiations between the parties.

Allterco will be entitled to pay up to 50% of the price due to the owners of the capital – individuals with

their own shares.

The indicative deadline for closing the transaction is 3 months from the date of conclusion of term sheet.

Under certain conditions, this period may be extended by up to 3 months.

With the acquisition, Allterco intends to expand its technology portfolio and thereby expand the supply of products for both customers and professional consumers.

On August 1 2022 the Company disclosed to the FSC and the Public a financial statement for the second quarter of 2022 on an individual basis.
