Munich roadshow feedback: Achievement of mid-term targets within reach

After Shelly had already published excellent preliminary revenue figures for 2024 two weeks ago, the level of interest shown by a dozen investors at the Munich roadshow was very high. The key items addressed were the continuing high competitive quality and the path towards the mid-term target in 2026.

Competitive advantages in the Smart Home market: We believe that the basis of Shelly's success is the high product quality, which convinces customers because of the open system architecture, high compatibility (WLAN, Bluetooth, z-Wave, KNX, etc.) and the application diversity. Furthermore, the Smart Home devices have an attractive price tag, which is roughly half the price of direct competitors such as Homeatic or Plejd and lowers the first hurdles associated with a purchase.

Mid-term targets within reach: Given the outstanding growth rates of the past (CAGR 2021-24: 52.1%), investors questioned as to what extent this momentum can be maintained in the coming years. To achieve its own mid-term target for 2026 of EUR 200m in revenues, annual growth rates of 36.7% would be needed. Based on the general development in the Smart Home market with annual growth rates of 10-15% over the next few years, Shelly is expected to continue its above-average growth on the grounds of the superior products according to Co-CEO Wolfgang Kirsch. Part of this growth is expected to be generated by existing customers that do not only make one-off purchases but install roughly two more devices per year according to the company and thus guarantee predictable revenue streams. This trend is supported by the further expansion of the product assortment by smart locks (cf. Comment of 11 July 2024) and cameras. Geographically, we believe that the big Smart Home markets in the UK and France still have great potential for further growth as these markets have been tapped by Shelly to a much lesser extent than the DACH region and North Europe. By establishing local sales teams and partnerships with distributors, however, these regions are expected to generate relevant sales contributions in the mid-term.

Alongside the further market penetration in the DIY segment (with Shelly's 4th generation products launched in 2025/26 amongst others), the Smart Home provider increasingly focuses on the professional segment. The focus here is on so-called fleet managers helping companies to centrally control their buildings, i.e. by automatically switching off air conditioning, heating and lighting at night. Shelly also collaborates with digital assistants such as Amazon Alexa to enable smart, voice-based control in hotels and retirement homes as well.

Conclusion: Shelly has met with great interest from investors in Munich and provided insights into the company's history but especially into the future direction of the Smart Home provider. We believe that Shelly is well equipped for 2025 in terms of products and is still not overpriced with a PER 2025e of 19.8 given the continuing strong growth. We reiterate price target and buy recommendation.

Figures in EUR m, EPS in EUR, Price: 35.10 EUR

Company Background

Shelly Group is a joint stock company under Bulgarian law (AD) headquartered in Sofia, which is specialized in the development and distribution of products from the smart home sector. The company also distributes tracking products, but they rather play a minor financial role (revenue share: < 5%).

The reporting currency is lev (BGN). Bulgaria has planned to join the euro with effect of 1 January 2024. As the lev was tied to the Deutsche Mark for historical reasons (at a ratio of 1:1 since 1999), the lev to euro conversion rate corresponds to the DM at that time, namely 1 lev = 0.51129 euros and 1 euro = 1.95583 lev. This rate has been fixed by Bulgarian law and does not change.

The smart home products are sold under the „Shelly” brand. Alongside plug-and-play solutions and sensors, the portfolio mainly includes relays which are installed hidden behind the socket or switch, and which can be directly controlled via a Wi-Fi connection or Bluetooth. The company differs essentially from many other providers (Philips Hue, Tado or Fibaro amongst others), whose product often can only be controlled via a hub/bridge within their own ecosystem. Furthermore, the products can be combined with other smart home applications and are in the entry-level price segment with a starting price of less than EUR 20. In addition to smart home products, the product portfolio also includes smartwatches specifically for children as well as tracking devices, for instance for baggage, pets, or health care data.

Major events in the company's history

- 2003 Foundation of Teracomm Ltd. in the field of telecommunications services
- 2012 Foundation of today's Allterco JSCo holding company with the intention to bundle the structure

- 2003 Foundation of Teracomm Ltd. in the field of telecommunications services
- 2012 Foundation of today's Allterco JSCo holding company with the intention to bundle the structure
- 2013 Development of "Shelly", the first home automation device
- 2015 Reorganization of the company and focus on IoT sector
- 2016 IPO at the Bulgarian BVB stock exchange
- 2018 Establishment and expansion of Shelly and MyKi products with international distribution
- 2019 Sale of the European telco business and exclusive focus on smart home and tracking products & Expansion in the USA
- 2020 Capital increase for growth financing and increase in trading liquidity (gross emission proceeds: BGN 9.2m)
- 2021 Additional listing at the Frankfurt Stock Exchange & Disposal of non-relevant subsidiaries in Asia from a strategic point of view
- 2023 Acquisition of Slovenian IoT provider GOAP d.o.o. & renaming in "Shelly Group"

Products

The Shelly Group's product portfolio spans from various smart home products and smartwatches specifically for children to monitoring and tracking products. Smart home products account for the lion's share (> 95%) of group's revenues and thus are at the center of the company's equity story.

Source: Company data

The smart home products are sold and distributed under the **"Shelly"** brand. Relays build the basis of these products. They allow for remote control of lights, electric devices, or sensors. These relays are connected to the power supply behind a socket or a switch and can be controlled through Wi-Fi via the Shelly app or one of many different providers from the IoT sector (Amazon Alexa, Google Home, SmartThings, Home Assistant etc.) entirely without additional hub. Besides controlling the devices in case of need, Shelly also allows for establishing routines (e.g. retracting the awning in the event of storm warnings) and monitoring energy consumption. Because of the Wi-Fi standard used, the relays can be combined with other smart home devices with Wi-Fi standard without any problems.

In addition to the traditional relays, which people can easily install in their own home, the Shelly brand also offers products within their **Pro line** for an installation in the fuse box. The Pro products can be controlled both via Wi-Fi and LAN and thus are more secure and reliable. Consequently, the Shelly Pro line is often also installed in office buildings, retail stores or production sites. We believe it is also of major interest for B2B customers (such as electricians). The **Plus line** introduced a new generation of Shelly relays, which are characterized by newer technology (processor, W-Fi and Bluetooth module) and a slightly smaller design.

Alongside the relays, which are not visible after their installation, Shelly Group also offers various **plug-and-play** products. The assortment includes the Shelly Plug (WiFi socket), the Shelly Bulb (smart bulb), the Shelly Button (programmable Wi-Fi button) and the Shelly TRV (WiFi heating thermostat). Additionally, the Shelly product portfolio provides various **detectors and sensors** (motion detectors, temperature and humidity sensors, smoke detectors as well as door and window sensors).

Most of Shelly Group's products are developed in Sofia. The key parts of the raw materials – most notably chips – are procured by the company itself and made available to the suppliers in Asia. Procurement is almost exclusively done in China among a couple of core suppliers (Top 5 suppliers > 90% of material expenses). The group always strives to be the largest customer of every supplier to have a good bargaining position. As the products have a very low pack size, they are shipped by air and sea freight. The share of sea freight is planned to be significantly increased to continue to lower ancillary costs of procurement.

Markets and sales

The company does not provide segment reporting pursuant to IFRS 8 so far. The 2023 Annual Report is based on a regional segment analysis as primary segment.

Shelly Group generates the largest portion of revenues in the DACH region (49%). In further European countries, the group most recently generated a sales share of around 43.7%. The rest of the world (RoW) accounts for further 7.3%. The company still sees significant growth potential in all the regions. Due to the success of actions made to optimize revenues in the DACH region, local sales teams are also being set up in further markets. The North American market is a key growth region in the RoW sector, which has hardly been developed so far. According to the company, in addition to the progress made recently inorganic growth may also be an option here to accelerate the development of the market.

Sales by region (left) and by distribution channel (right)

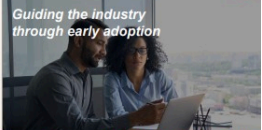

Source: Company data

Just under 20% of the products are currently distributed through the Shelly websites (D2C online). The company wants to significantly professionalize D2C sales over the next few quarters. As a start, the web shops will be relaunched in all relevant languages. In parallel, however, the company also pushes ahead the backend processes for faster delivery times as well as the SEO and SEA optimization.

The B2B sector includes all sales to commercial customers. Most of them resell the products via online channels such as Amazon. At present, Amazon Germany is exclusively addressed by partners. The company assumes that only some 10% of B2B revenue are currently generated with electricians. Professional providers likewise hold significant growth potential. For instance, the Shelly Group is currently negotiating with a major electrical wholesaler for a listing of the Shelly products.

ESG positioning

In line with the product portfolio, which includes a broad variety of products for energy metering and energy conservation, the company also pursues ambitious ESG goals. Amongst others, this includes the conversion to 100% renewable energy and the reduction of energy consumption by 70% by 2030 at the latest. Furthermore, the Shelly Group aims to establish more diversity at management level and to provide a concerted work-life balance for the employees. The table below summarizes the ESG goals.

Ecological 	Social 	Governance 
<p><i>Developing a sustainable future</i></p> 	<p><i>Connecting communities across the globe</i></p> 	<p><i>Guiding the industry through early adoption</i></p> 
<p>Enabling On target to reduce company energy consumption latest by 70% by 2030</p> <p>Sustainability On Track to shift Internal Products & Services to sustainable alternatives latest by 2030</p> <p>100% renewables In-line with company commitment to have a net zero carbon footprint latest by 2030</p>	<p>Communities Committed to a sustainable environment for the communities we serve</p> <p>Employees & Neighbors Engaged as employees & neighbors, actively working together to benefit our community</p> <p>Outreach Actively communicating to benefit our community & environment</p>	<p>Diverse Leadership Committed to a diverse leadership & supervisory board</p> <p>Empowering Delivering results while empowering employees to make key decisions</p> <p>Enabling Balance Flexible employee workplaces</p>

Management

The Shelly Group has a one-tier governance model with an executive and non-executive board structure. Dimitar Dimitrov and Wolfgang Kirsch are executive board members responsible for the company’s operational management.

Dimitar Dimitrov is the founder, CEO of the Bulgarian holding company, and one of the biggest individual shareholders with a stake of some 30%. In addition to administrative topics at group level, Mr. Dimitrov is primarily responsible for R&D. Mr. Dimitrov had already established other IT companies before, such as a software company for 8- and 16-bit computers and a television channel (REAL TV) as well as IT magazines such as PC Review, Computers, and GSM Review.

Wolfgang Kirsch has been the CEO of Shelly Europe since end-2021 and is primarily focused on the expansion of the European business. Prior to this, Mr. Kirsch had been active in the retail business for over 25 years. He held the position of Chief Operating Officer (COO) at the MediaMarktSaturn retail group. Following his job at MediaMarktSaturn, Mr. Kirsch worked as an external consultant of McKinsey & Company and of private equity companies and was involved in various projects related to the digital transformation of international conglomerates and midsize companies.

Shareholder structure

The shares of the Shelly Group are traded on the regulated market of the Frankfurt Stock Exchange. The share capital is divided in 17,999,999 ordinary shares. Board member Dimitar Dimitrov and co-founder Svetlin Todorov are the largest individual shareholders with a stake of around 30.3% and 29.4%. The stakes of the other shareholders are below the 3% threshold and are therefore included in the free float (40.3%).

Disclaimer

This document does not represent any offer or invitation to buy or sell any kind of securities or financial instruments. The document serves for information purposes only. This document only contains a non-binding opinion on the investment instruments concerned and non-binding judgments on market conditions at the time of publication. Due to its content, which serves for general information purposes only, this document may not replace personal, investor- or issue-specific advice and does also not provide basic information required for an investment decision that are formulated and expressed in other sources, especially in properly authorised prospectuses. All data, statements and conclusions drawn in this document are based on sources believed to be reliable but we do not guarantee their correctness or their completeness. The expressed statements reflect the personal judgement of the author at a certain point in time. These judgements may be changed at any time and without prior announcement. No liability for direct and indirect damages is assumed by either the analyst or the institution employing the analyst. This confidential report is made available to a limited audience only. This publication and its contents may only be disseminated or distributed to third parties following the prior consent of Montega. All capital market rules and regulations governing the compilation, content, and distribution of research in force in the different national legal systems apply and are to be complied with by both suppliers and recipients. Distribution within the United Kingdom: this document is allotted exclusively to persons who are authorized or appointed in the sense of the Financial Services Act of 1986 or on any valid resolution on the basis of this act. Recipients also include persons described in para 11(3) of the Financial Act 1986 (Investments Advertisements) (Exemptions) Order 1996 (in each currently valid amendment). It is not intended to remit information directly or indirectly to any other groups or recipients. It is not allowed to transmit, distribute, or to make this document or a copy thereof available to persons within the United States of America, Canada, and Japan or to their overseas territories.

Reference pursuant to MiFID II (as of 20.01.2025):

This publication was prepared on the basis of a contract between Montega AG and the issuer and will be paid by the issuer. This document has been widely published and Montega AG makes it simultaneously available for all interested parties. Its receipt therefore is considered a permissible minor non-monetary benefit in the sense of section 64 Paragraph 7 Sentence 2 No. 1 and 2 of the German Securities Trading Act (WpHG).

Supervisory authority:

Financial Supervisory Authority
Graurheindorfer Str. 108
53117 Bonn

Sources of information: The main sources of information for the preparation of this financial analysis are publications of the issuer as well as publicly available information of national and international media, which Montega regards as reliable. There have also been discussions with members of the management team or the investor relations division of the company concerned when preparing this analysis.

Prices of financial instruments mentioned in this analysis are closing prices of the publishing date (respectively the previous day) if not explicitly mentioned otherwise. Any updating of this publication will be made in the case of events that Montega considers to be possibly relevant to the stocks' price performance. The end of regular comments on events in context with the issuer (coverage) will be announced beforehand.

Fundamental basics and principles of the evaluative judgements contained in this document:

Assessments and valuations leading to ratings and judgements given by Montega AG are generally based on acknowledged and broadly approved methods of analysis i.e. a DCF model, a peer group comparison, or sum-of-the-parts model.

Our ratings:

Buy: The analysts at Montega AG believe the share price will rise during the next twelve months.

Hold: Upside/downside potential limited. No immediate catalyst visible.

Sell: The analysts at Montega AG believe the share price will fall during the next twelve months.

Conflicts of interest

Montega has implemented various measures to avoid conflicts of interest. This includes a ban for all employees of Montega AG from trading stocks within the coverage universe for which Montega has a mandate for the creation of research. Additionally, both employees and the company are prohibited from accepting gifts from individuals with a special interest in the content of research publications. To ensure maximum transparency, Montega has created an overview in accordance with § 85 WpHG and Article 20 of Regulation (EU) No. 596/2014 in conjunction with Delegated Regulation 2016/958. The research report has been made available to the company prior to its publication / dissemination. Thereafter, only factual changes have been made to the report.

- (1) In the past 12 months, Montega has entered into an agreement with the issuer for the creation of financial analyses, for which Montega receives compensation.
- (2) In the past 12 months, Montega has entered into an agreement with a third party for the creation of financial analyses, for which Montega receives compensation.
- (3) In the past 12 months, Montega has provided other consulting services to this company and/or its shareholders.
- (4) In the last 12 months, Montega and/or an contractually bound affiliated entity have been party to an agreement with the analyzed company for services related to investment banking activities or have received compensation from such an agreement.
- (5) Montega and/or an affiliated entity expect compensation from the company for investment banking services in the next three months or intend to seek such compensation.
- (6) At the time of publication, Montega's analyst responsible for the publication or another Montega employee holds shares representing over 5% of the analyzed issuer's share capital.
- (7) At the time of publication, Montega's analyst responsible for the publication or another Montega employee holds a net long or short position of more than 0.5% of the analyzed issuer's share capital.
- (8) A company affiliated with Montega AG may be involved in the share capital of the issuer or hold other financial instruments in this company.
- (9) Montega or an affiliated entity has significant financial interests in the analyzed company, such as obtaining and/or exercising mandates or providing services for the analyzed company (e.g., roadshows, round tables, earnings calls, presentations at conferences, etc.).
- (10) In the last 12 months, Montega provided services (through a third party) to a member of the analyzed company's management related to the transfer of shares of the analyzed company and received compensation for this.
