On February 22, 2024, Shelly Group SE exercised its call option to acquire an additional 16% share of the capital of its subsidiary Slovenian IoT company Shelly Tech.

The remaining 24% of the company's shares held by three partners are subject to an additional Call/Put option that can be exercised in 2026 according to the agreed terms.

In 2024, the subsidiary Shelly Trading EOOD opened a representative office in the Netherlands.

On May 31, 2024, the Parent company exercised its call option to acquire 50% in the associated company Shelly Asia ltd., (formerly known as Allterco Asia ltd.), and thus the ownership share reached 80%.

On April 24, 2025 with a decision of the Board of Directors of Shelly Group SE Shelly Poland SP. Z O O was established, a subsidiary in Poland, with a share capital of 374 thousand euro (PLN 1 600 000).

## 2. Basis for preparation of the financial statements and material accounting policy information

### 2.1. Basis for preparation

The Group keeps its current accounting records and prepares its financial statements in accordance with the requirements of the Bulgarian commercial and accounting legislation.

These consolidated financial statements have been prepared in accordance with the requirements of the International Accounting Standards (IAS), published by the International Accounting Standards Board (IASB) and adopted by the European Union (EU).

As of March 31, 2026, IASs comprises the IFRS Accounting Standards as adopted by EU and the interpretations of the International Financial Reporting Interpretations Committee (IFRIC), approved by the IASB, and the International Accounting Standards and Interpretations of the Standing Interpretations Committee (SIC), approved by the International Accounting Standards Committee (IASC), effective from January 1, 2026, and adopted by the EU.

All amounts are in thousand euro unless otherwise stated

## 2.2. Initial application of new and amended IFRS Accounting Standards

### 2.2.1. Standards effective for the current reporting period

The Group's management has complied with all standards and interpretations that are applicable to its activity and have been officially adopted by the EU as of the date of preparation of these consolidated financial statements.

The management has reviewed the changes in the existing accounting standards effective from January 1, 2026 and believes that they do not require changes in terms of the accounting policy applied in the current year.

At the date of preparation of these consolidated financial statements, the following new standards, issued by IASB and adopted by the EU are effective:

- **Amendments to IFRS 9 and IFRS 7** - Amendments to the Classification and Measurement of Financial Instruments (effective for annual periods beginning on or after 1 January 2026);
- **Amendments to IFRS 9 and IFRS 7** - Contracts Referencing Nature-dependent Electricity (effective for annual periods beginning on or after 1 January 2026);
- **Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7** - Annual Improvements to IFRS Accounting Standards - Volume 11 - effective for annual periods beginning on or after 1 January 2026;

The adoption of the new amendments to the existing IFRS accounting standard has not had any material impact on the disclosures or on the amounts reported in these consolidated financial statements.

### 2.2.2. Amendments to the existing IFRS accounting standards issued by the IASB and adopted by the EU, but not yet effective

At the date of authorisation of these financial statements, the Group has not applied the following amendments to IFRS accounting standards that have been issued by IASB and adopted by EU but are not yet effective:

- **IFRS 18 - Presentation and Disclosures in Financial Statements** (effective for annual periods beginning on or after 1 January 2027).

### 2.2.3. New standards and amendments to the existing IFRS accounting standards, issued by the IASB, but not yet adopted by the EU

At present, IFRS Accounting Standards as adopted by the EU do not significantly differ from regulations adopted by the IASB except for the following new standards and amendments to the existing standards, which were not endorsed for use in EU as at the date of publication of these consolidated financial statements (the effective dates stated below is for IFRS Accounting Standards as issued by IASB):

All amounts are in thousand euro unless otherwise stated

- **IFRS 19 with further amendments - Subsidiaries without Public Accountability: Disclosures** (effective for annual periods beginning on or after 1 January 2027);
- **Amendments to IAS 21** - Translation to a Hyperinflationary Presentation Currency (effective for annual periods beginning on or after 1 January 2027);
- **IFRS 14 Regulatory Deferral Accounts** (effective for annual periods beginning on or after January 1, 2016) - the European Commission has decided not to launch the endorsement process of this interim standard and to wait for the final standard;
- **Amendments to IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures** - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture and further amendments (effective date deferred by IASB indefinitely but earlier application permitted). Endorsement process postponed indefinitely until the research project on the equity method has been concluded.

The Group anticipates that the adoption of these new standards and amendments to the existing standards will have no material impact on the consolidated financial statements of the Group in the period of initial application, except for IFRS 18 which is expected to have material impact on the presentation and disclosure of information in the financial statements. The Group is in process of analysing the specific impact of IFRS 18 on its consolidated financial statements, however, the new standard will not affect the recognition of financial results, it will affect only their presentation and disclosure.

Hedge accounting for a portfolio of financial assets and liabilities whose principles have not been adopted by the EU remains unregulated.

According to the Group's estimates, the application of hedge accounting to a portfolio of financial assets or liabilities pursuant to **IAS 39 Financial Instruments** - Recognition and Measurement would not significantly impact the consolidated financial statements, if applied as at the reporting date.

### 2.3. Going concern

The consolidated financial statements of the Group have been prepared on the going concern principle, as it is expected that the Group shall continue its operating activity in near future.

A military conflict between Russia and Ukraine continued during the reporting period, but since the Group does not have transactions and accounts with customers from these two countries, management believes that this event is not expected to directly or indirectly affect the Group's results and financial position in the future.

*All amounts are in thousand euro unless otherwise stated*

The military conflict in the Middle East, even after its escalation in early March 2026, is also not expected to directly impact the Group's results and financial position, as a negligible portion of the subsidiaries' revenues are from customers in the region. In addition, the Group's management has taken actions to maintain sustainable supply chains in view of the increased geopolitical uncertainty. [Management has no plans or intentions to sell the business or cease operations, which could materially change the measurement or classification of assets and liabilities reported in the consolidated financial statements.

The assessment of assets and liabilities and the measurement of income and expenses is made in compliance with the historical cost principle. This principle is modified in specific cases by the revaluation of certain assets and/or liabilities to their fair value, as indicated in the relevant notes below.

#### **2.4. Functional and reporting currency**

According to the Law on the Introduction of the Euro in the Republic of Bulgaria, as of January 1, 2026, the official currency and legal tender in the Republic of Bulgaria is the euro. The fixed exchange rate is 1.95583 leva for 1 euro. In this regard, from the beginning of 2026, the functional currency and the presentation currency of the Group's financial statements is the euro (EUR). These interim consolidated financial statements are prepared in thousands of euros, unless otherwise indicated in the relevant place. Earnings per share are presented in euros.

The data in the elements of the consolidated financial statements and the notes thereto are presented in thousands of euro, unless explicitly stated otherwise.

The companies of the Group keep their accounting records in the functional currency of the country in which they operate. The effects of exchange differences relating to the settlement of foreign currency transactions or the reporting of transactions in a foreign currency at rates that are different from those at which they were originally recognised shall be included in the consolidated statement of comprehensive income at the time they arise, treated as "other operating income and expenses" except those related to investments and loans denominated in foreign currency, which are presented as "finance income" and "finance expenses".

Non-monetary assets and liabilities originally denominated in a foreign currency are accounted for in a functional currency using the historical exchange rate at the date of the transaction and subsequently not revalued at a closing rate.

#### **2.5. Comparative data**

According to the Bulgarian accounting legislation and IAS, the financial year ends on December 31 and enterprises are required to present annual financial statements as of the same date, together with comparative data as of that date for the previous year.

All amounts are in thousand euro unless otherwise stated

If necessary, the data presented for the previous year are adjusted for better comparability with the data from the current period.

As of January 1, 2026, the official currency and legal tender in the Republic of Bulgaria is the euro. All comparative data for previous periods have been translated at the official fixed exchange rate of 1.95583 leva per 1 euro. Differences resulting from rounding or exchange rate translation are reflected in this interim report in accordance with the requirements of the Law on the Introduction of the Euro in the Republic of Bulgaria. The Group has not realized a significant effect from the translation into euro of the opening balances as of January 1, 2026 in connection with a change in the functional (reporting) currency.

These interim consolidated financial statements for the period ended March 31, 2026 are prepared in euros, following the transition to the euro, which is the functional currency of the Group, effective January 1, 2026. All amounts are presented in thousands of euros, including comparative information for 2025, unless otherwise stated.

The comparative data for 2025 has been reclassified in the designated explanatory notes to ensure comparability with the current period presentation. The reclassification has no effect on the net financial result, total comprehensive income, or the Group's equity.

## **2.6. Transactions and balances**

A transaction in foreign currency is recognized initially in the functional currency by applying the foreign currency exchange rate (spot) between the functional currency and the foreign currency at the time of the transaction or operation.

At each date of financial statement preparation:

- (a) monetary positions, receivables and payables denominated in foreign currency are recalculated into the functional currency using the reference exchange rate of euro to the foreign currency published by the BNB on their web page on the last business day of the respective month;
- (b) non-monetary items held at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction, if an exchange rate other than that of the transaction (average monthly, daily or other) is applied; and
- (c) non-monetary items held at fair value in a foreign currency are recalculated using the exchange rates at the date when the fair value was determined.

Foreign currency exchange differences are recognized in accordance with IAS 21 the Effects of Changes in Foreign Exchange Rates.

The items of the consolidated statement of financial position and consolidated statement of comprehensive income of foreign companies of the Group, using a functional currency other than euro, are retranslated into euro to be included in the consolidated statement of the Group as follows:

All amounts are in thousand euro unless otherwise stated

- All monetary and non-monetary assets and liabilities (including comparative information) are recalculated at the reference exchange rate of euro to the foreign currency published by BNB on their web page at the date of the relevant statement of financial position; Monetary positions in foreign currency as of December 31, 2025 and March 31, 2026 are retranslated in these financial statements at the closing exchange of the BNB. As of December 31, 2025 – 1.1757 USD for 1 EUR; 0.8292 GBP for 1 EUR, 8.2216 CNY for 1 EUR, 4.5723 PLN for 1 EUR and 1.95583 BGN for 1 EUR, and as of March 31, 2026 – 1.1498 USD for 1 EUR; 0.8683 GBP for 1 EUR; 7.9341 CNY for 1 EUR and 4.289 PLN for 1 EUR.
- The income and expense items of each comprehensive income statement are recalculated at the accounting date at the weighted average exchange rate for the accounting period;
- All exchange rate differences obtained are recognized in the statement of comprehensive income.
- The cumulative amount of these exchange rate differences is presented in a separate component of equity until the foreign operation is disposed.
- Share capital and other components of equity are translated using the historical rate, i.e. the exchange rate at the date of issue of share capital, or at the date of the associated transaction for other components of equity.

## 2.7. Accounting estimates and judgements

The application of the IAS requires the Group's management to apply certain accounting assumptions and judgments when preparing the annual consolidated financial statements and when determining the value of some of the assets, liabilities, income, expenses and contingent assets and liabilities.

All assessments are based on the management's best judgment as of the date of preparation of these consolidated financial statements. Actual results could differ from those presented in these consolidated financial statements.

In preparing these consolidated financial statements, the management used judgments related to the following items:

- Right-of-use assets – period of use of the assets and discount factor (Note 3.03)
- Short-term receivables – need for impairment (Note 3.08)
- Retirement benefits obligations (Note 3.13)
- Deferred tax assets (Note 3.06)
- Warranty service provision (Note 3.16)

## 2.8. Subsidiaries and associated companies

Subsidiaries are the entities over which Shelly Group SE exercises control as defined in IFRS 10 Consolidated Financial Statements.

The parent-company (the investor) controls the investee company if it has:

- Rights over the ownership of the subsidiary;

All amounts are in thousand euro unless otherwise stated

- Rights over the variable returns from its participation in the subsidiary;
- Ability to use its powers over the entity in order to influence the size of return on investment.

Subsidiaries are considered controlled starting from the date on which control is acquired by the Group and they cease to be consolidated on the date when it is assumed that the control has been lost.

Associated company is a company in which the Group has significant influence on decisions regarding operating and financial policies, but without being able to fully control those policies.

## 2.9. Discontinued operations

In case of sale or other form of loss (transfer) of control over a subsidiary:

- The assets and liabilities (including if there is associated goodwill) of the subsidiary are written off at book value on the date of loss of control.
- The non-controlling interest in this subsidiary is written off at book value in the consolidated statement of financial position as of the date of loss of control, incl. any components of other comprehensive income related thereto.
- The consideration received from the transaction, event or operation that led to the loss of control is recognized at fair value;
- Any resulting difference is recognized as “gain or loss on disposal (sale) of a subsidiary” in the consolidated statement of comprehensive income belonging to the parent company. Profits or losses from the sale (release) of a given subsidiary (enterprise) from the Group also include the book value of the goodwill, deductible for the sold (released) company (enterprise).

## 2.10. Non-controlling interest

The non-controlling interest is valued at the proportionate share of identifiable net assets at the date of acquisition.

Changes in the Group’s ownership interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group’s interests and non-controlling interests is adjusted to reflect changes in their relative interests in subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Parent Company.

All amounts are in thousand euro unless otherwise stated

## 2.11. Consolidation

The consolidated financial statements of the Group include the financial statements of the parent company and the subsidiaries. All assets, liabilities, capital, income, expenses and cash flows of the group companies are presented as such as they belong to just one entity.

Subsidiaries are those entities that are controlled by the Parent Company. Control occurs when the parent company exercises its rights on variable return arising from its participation in the subsidiary's capital and has the ability to influence this return from investment through its power. The consolidated financial statements have been prepared following the same accounting policies with respect to similar transactions and business facts of all companies in the Group. All mutual interests, as well as significant internal transactions, balances and unrealized gains in the Group are eliminated and the financial statements are prepared using the full consolidation method. The financial results of operations of the subsidiaries are included in the consolidated financial statements from the date of acquisition of control over them and cease to be consolidated from the date on which such control is lost. When a subsidiary is acquired as a result of an internal group restructuring, its net assets and financial result are included from the beginning of the earliest accounting period presented in the financial statements.

## 2.12. Definition and assessment of the items of the consolidated financial statements

### 2.12.1. Revenue

The Group recognises revenue from the following major sources:

#### *Sale of electronic devices*

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognises revenue when it transfers control of a product or service to a customer.

The Group sells electronic devices both to the wholesale market and directly to customers through its own website and through direct sales. Sales-related warranties associated with the products cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Group accounts for warranties in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets (see Note 3.16).

For sales of electronic equipment to the wholesale market, revenue is recognised by the Group when control of the goods has transferred, being at the moment when the goods are shipped. Following shipment dispatch, the wholesaler has full discretion over the manner of distribution and price to sell the goods and bears the risks of obsolescence and loss in relation to the goods. A receivable is recognised by the Group when the goods are delivered to the wholesaler as this represents the point in time at which the right to consideration becomes unconditional, and the Group expects to receive payment in the agreed term.

All amounts are in thousand euro unless otherwise stated

The Group recognizes revenue from sales through an online store at the time the goods are shipped to the address requested by the customer. The payment received from the customer is initially recognized as a contractual obligation until the goods are shipped to the customer.

Under the Group's standard contract terms, customers have a right of return within 14 days. In case of returned goods, the Group adjusts the recognized revenue by reducing it by the value of the returned goods. At the same time, the Group has an obligation to receive back the returned goods, if the customer decides to exercise its right to return the goods and accordingly reduces the cost of goods sold and increases its stock.

The Group uses historical experience to determine the expected value of returned goods in each calendar year. The method assumes that the Group does not expect, with a high probability, to receive returns of goods in amounts significantly exceeding the volume of returned goods in previous years, expressed as a percentage of revenue.

During the year there are no changes in the Group's revenue recognition policy related to sales of electronic devices.

#### ***Revenue from services***

The Group reports revenue from services, complying with the commitments under the contract. Revenue from services is reported upon final completion of the services recognized as performed.

The Group offers its customers a subscription to cloud services. The subscription can be paid in monthly instalments or once for a calendar year. In the event that a customer pays an annual subscription, the entire amount is initially recognized as a contractual liability, and each month 1/12 of the amount paid is recognized as revenue.

#### ***Other income/revenue***

Other income and revenue are recognized when the right to receive them is established.

The Group companies apply IFRS 15 and the management carefully examines its trade practices for possible changes at the time of revenue recognition. No change in the performance obligations and the price allocation in the contracts and revenue recognition is needed for the reporting year.

#### **Finance income and expenses**

Finance income and expenses are recognised in profit or loss for all instruments measured at amortised cost using the effective interest method. The effective interest rate method is a method for calculating the amortised cost of a financial asset or liability and allocating interest income or expense over the relevant period. An effective interest rate is one at which the estimated future cash payments or receipts during the life of the financial instrument or, in certain cases, for a shorter period, are accurately discounted to the net

*All amounts are in thousand euro unless otherwise stated*

carrying amount of the financial asset or liability. In calculating the effective interest rate, the Company measures cash flows taking into account all the contractual terms of the financial instrument but excluding potential future credit impairment losses. The calculation includes fees, transaction costs, premiums or discounts paid or received between the parties to the contract, which are an integral part of the effective interest rate. Finance expenses comprise interest expenses and other direct costs on loans, as well as bank commissions and currency exchange rate losses.

### **2.12.2. Expenses**

Expenses at the Group companies are recognised when incurred. Expenses are recognised when there is a decrease in future economic benefits associated with a decrease in an asset or an increase in a liability that can be measured reliably. Recognition of expenses for the current period is made when the corresponding income is accrued. An expense is recognised immediately in the consolidated statement of comprehensive income, when the expense does not generate a future economic benefit or when, and to the extent that, future economic benefit does not qualify or no longer qualifies for recognition of an asset in the consolidated statement of financial position. Expenses are accounted for on the accrual basis and comparability with reported income. They are measured at the fair value of the liability paid or to be paid.

Expenses for future periods shall be deferred for recognition as current expenses in the period in which the obligations under the contracts to which they refer, would be performed.

### **2.12.3. Property, plant and equipment**

Property, plant and equipment (non-current tangible assets) are presented in the financial statements at acquisition cost (cost price) less accumulated depreciation and impairment losses.

#### **Initial recognition**

Upon initial acquisition, property, plant and equipment are evaluated at acquisition cost (cost price), which includes the purchase price, including customs charges and any directly attributable costs of bringing the asset to working condition. The direct costs are as follows: costs of site preparation, costs of initial delivering and handling, installation costs, costs for personnel remuneration fees related to the project, non-refundable taxes, etc.

When acquiring property, plant and equipment on a deferred payment basis, the purchase price is equivalent to the present value of the liability, discounted on the basis of the interest rate on the borrowed resources of the Group with a similar maturity and purpose. The difference between the cash price equivalent and the total payment is recognized as interest over the course of the loan, unless it is capitalized in accordance with IAS 23.

#### **Measurement after recognition**

All amounts are in thousand euro unless otherwise stated

The approach chosen by the Group for the subsequent measurement of property, plant and equipment is the acquisition cost model - less any subsequent depreciation and any accumulated impairment losses.

For all other classes of non-current tangible assets, the Group applies the acquisition cost model.

### Depreciation Methods

The Group uses the straight-line method of depreciation of non-current tangible assets. Depreciation of assets begins when they are available for use. The useful life by groups of assets is determined in accordance with: physical wear and tear, specifics of the equipment, future intentions for use and actual obsolescence.

The useful life by classes of assets is as follows:

Vehicles	4 years
Buildings	25 years
Computer equipment	2-5 years
Office equipment	5-6.67 years
Other non-current tangible assets	6.67 years

The determined useful life of non-current tangible assets is reviewed at the end of each year and, if significant deviations are found against future expectations for the useful life of the assets, it is adjusted prospectively.

### Derecognition of non-current tangible assets

The carrying amount of an item of property, plant and equipment is written off: when it is sold, when no other economic benefits are expected from its use, or when it is disposed.

Gains or losses arising on the derecognition of an item of property, plant and equipment are included in the statement of comprehensive income when the asset is written off. Gains and losses on disposals of non-current assets are determined when the proceeds from sale (disposal) are reduced by the book value of the asset and the costs related to the sale. They are stated net, to "Other operating income" in the statement of comprehensive income.

The amount of consideration to be included in the gain or loss arising from the derecognition of an item of property, plant and equipment is determined in accordance with the requirements for determining the transaction price in paragraphs 47–72 of IFRS 15. Subsequent changes to the estimated amount of the consideration included in the gain or loss shall be accounted for in accordance with the requirements for changes in the transaction price in IFRS 15.

All amounts are in thousand euro unless otherwise stated

#### **2.12.4. Intangible assets**

Intangible assets are presented in the consolidated financial statements at acquisition price (cost price) less accumulated depreciation and impairment losses.

The Group applies a straight-line method of depreciation of intangible assets with a useful life of 2 years for the software products, 6.67 years for the prototypes and software development, 3 years for an ISO certificate.

The book value of the intangible assets is reviewed for impairment when there are events or changes in circumstances that indicate that the book value amount could exceed their recoverable amount. Then the impairment is included as an expense in the consolidated statement of comprehensive income.

#### **Initial recognition**

Externally generated intangible assets on their acquisition are measured at acquisition price, which includes purchase price, import duties, non-refundable taxes and expenses of preparing the asset for its intended use. The direct expenses are: costs of employee benefits (as defined in IAS 19) and professional fees arising directly from bringing the asset to its working condition; costs for testing whether the asset is functioning properly, expenses for fees of persons related to the project, non-refundable taxes, etc.

Intangible assets are recognized if they meet the definition of intangible assets set out in IAS 38 Intangible Assets, namely:

- Meet the definition of an intangible asset;
- Upon their acquisition they can be reliably measured;
- Economic benefits are expected from the use of the asset, as evidenced by the availability or plan to obtain sufficient resources to enable the Group to obtain the expected economic benefits; the ability to effectively perform its functional role in accordance with the intention of the Group regarding its use or there is a clearly defined and specified technical feasibility.

#### **Subsequent costs**

Expenses related to the maintenance of initially established standard efficiency, incurred after the commissioning of intangible non-current assets, are recognized as current at the time when they are incurred.

The carrying amount of the respective intangible asset is adjusted by the expenses that lead to increase of the expected future economic benefits from the use of an intangible asset above the initially determined standard efficiency.

All amounts are in thousand euro unless otherwise stated

#### **2.12.5. Goodwill**

Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognised. Initially, it is measured in the consolidated financial statements as the excess of the sum of the consideration transferred over the amount of the net assets of the acquired company and subsequently it is presented at acquisition cost less impairment losses. Goodwill is not amortized.

The goodwill originating as a result of the acquisition of a subsidiary is presented in the consolidated statement of financial position as a part of non-current assets and the goodwill originating as a result of acquisition of joint-ventures or associated companies is included in the total value of investment and is reported as “investments in associated companies”.

The goodwill associated with the acquisition of associated companies is tested for impairment as part of the total value of the investment. Separately recognized goodwill on the acquisition of subsidiaries is tested mandatorily for impairment at least once annually. Impairment losses on goodwill are not reversed subsequently. Gains or losses on sale (disposal) of a subsidiary of the Group also include the book value of the goodwill, associated with the sold (disposed) company.

Any goodwill amount recognized in the financial statements is attributable to a certain cash generating object at the time a business combination is completed, and this object is applied when tests for impairment are conducted. For determining the cash-generating objects, are considered only objects that are expected to generate future economic benefits and that are subject to the business combination, which generated the goodwill.

Losses from impairment of goodwill are presented in the consolidated statement of comprehensive income (in profit or loss for the year) as part of item “Impairment expenses”.

#### **2.12.6. Investments in associated companies**

These investments are reported in the consolidated financial statements of the Group by the equity method. By this method, the share of the Group in the comprehensive income of an associated company is consolidated on one line, so that the value of the investment corresponds to its share in the net assets as of December 31 for the respective year or at the end of the respective reporting period. The Group recognizes its share in losses in associated companies up to the amount of its investment, including internal loans granted, unless it has undertaken an obligation to pay such liabilities on behalf of the associated company.

As of March 31, 2026, the Group reports a share in the loss of associated companies amounting to 2 thousand euro. The value of the investment indicated in the consolidated statement of financial position has

All amounts are in thousand euro unless otherwise stated

been decreased by the same amount.

#### **2.12.7. Inventories**

Inventories are accounted at the lower of the two following values: price for acquisition (cost) and net realizable value.

Net realizable value is the estimated selling price in the ordinary course of business less the estimated costs of completing the production cycle and the estimated costs necessary to make the sale. In the event that inventories have already been depreciated to net realizable value and in a subsequent accounting period it turns out that the conditions that led to their impairment are no longer present, their new net realizable value is assumed. The amount of the refund can only be up to the amount of the book value of the inventory before the impairment. The amount of the reversal of the inventory value is reported as a reduction in the cost of materials for the period in which the reversal occurs.

The costs incurred to bring an inventory to its present condition and location are included in the cost of acquisition (cost) as follows:

- Materials - the purchase price and all related costs of delivery;
- Goods - the purchase price and all related costs of delivery, customs duties, transport costs, non-recoverable taxes and other costs incurred in order to bring the goods in ready for use state.

In the use (sale) of inventory, the weighted average method is used.

#### **2.12.8. Financial instruments**

A financial instrument is any contract that simultaneously gives rise to both a financial asset in one entity and a financial liability or equity instrument in another entity. Financial assets and liabilities are recognised in the consolidated statement of financial position when the Group becomes a party to the contractual terms of the relevant financial instrument that gave rise to this asset or liability.

##### **a) Financial assets**

###### ***Initial recognition and measurement***

Upon initial recognition, financial assets are classified as financial assets that are subsequently measured at amortized cost, at fair value in other comprehensive income (OCI) and as financial assets at fair value in profit or loss. Financial assets are classified upon their initial acquisition according to the characteristics of the contractual cash flows of the financial asset and the Group's business management model. The Group initially measures the financial asset at fair value plus transaction costs, in the case of financial assets that are not measured at fair value through profit or loss.

Trade receivables that do not have a significant financing component, and for which the Group has applied a practically expedient measure, are stated at the transaction price determined according to IFRS 15. The Group reclassifies financial assets only when its business model changes.

All amounts are in thousand euro unless otherwise stated

In order to be classified and measured at amortized cost or at fair value in OCI, the financial asset should generate cash flows that represent “solely payments of principal and interest” (SPPI) on the outstanding principal amount. This measurement is called the “SPPI test” and is performed at the relevant instrument level.

The Group’s business model for managing financial assets refers to how the Company manages its financial assets to generate cash flows. The business model determines whether cash flows will arise from the collection of contractual cash flows, the sale of financial assets, or both.

Purchases or sales of financial assets, the terms of which require the delivery of the assets within a certain period of time, usually established by a regulatory provision or current practice in the relevant market (regular purchases), are recognized on the date of trading (transaction), i.e. on the date on which the Group has committed to buy or sell the asset.

### ***Subsequent measurement***

For the purposes of subsequent measurement, financial assets are classified into four categories:

- Financial assets at amortized cost (debt instruments);
- Financial assets at fair value in other comprehensive income with “recycling” of cumulative profit or loss (debt instruments);
- Financial assets designated as financial assets at fair value in other comprehensive income with no “recycling” of cumulative profit or loss at their derecognition (equity instruments) (measurement alternative);
- Financial assets at fair value through profit or loss.

### ***Financial assets at amortized cost (debt instruments)***

The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model aimed at obtaining the contractual cash flows, and
- The terms of the contract for the financial asset give rise to cash flows on specific dates that represent solely payments of principal and interest on the outstanding principal amount.

Financial assets at amortized cost are subsequently measured using the effective interest rate (EIR) method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

The Group’s financial assets at amortized cost include trade and other receivables, term deposits and cash at bank accounts.

All amounts are in thousand euro unless otherwise stated

***Financial assets designated as financial assets at fair value in other comprehensive income (equity instruments)***

Upon initial recognition, the Group may elect to classify irrevocably as equity instruments designated as measured at fair value in other comprehensive income when they meet the equity requirements under IAS 32 Financial Instruments: Presentation and when they are not held for trading. The classification is determined on an individual instrument basis. These investments in equity instruments are held for medium to long-term purpose and accordingly, the Group elected to designate them as equity instruments at fair value through other comprehensive income as it believes that recognising short-term fluctuations in these investments fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long term purposes.

Gains and losses on these financial assets are never "recycled" in profit or loss.

Dividends are recognized as income in the statement of comprehensive income when the right to payment is established, except when the Group derives benefits from these receipts as a refund of part of the acquisition price of the financial asset, in which case the gains are reported in other comprehensive income. Equity instruments designated as measured at fair value in other comprehensive income are not in the scope of IFRS 9 expected credit loss model.

***Derecognition***

A financial asset (or, where applicable, part of a financial asset or part of a group of similar financial assets) is derecognised (i.e. removed from the Group's statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the rights to receive cash flows from the asset have been transferred or the Group has assumed the obligation to pay the received cash flows in full, without significant delay, to a third party through a transfer agreement; where either (a) the Group has transferred substantially all the risks and rewards of ownership of the asset; or (b) the Group has neither transferred nor retained substantially all the risks and rewards of ownership of the asset but has not retained control.

When the Group has transferred its rights to receive cash flows from the asset or entered into a transfer agreement, it evaluates whether and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of ownership of the financial asset, nor has it transferred control over it, it still recognizes the transferred asset to the extent of its continuing involvement in it.

In this case, the Group also recognizes the related obligation. The transferred asset and related liability are valued on a basis that reflects the rights and obligations that the Group has retained. A continuing involvement being a security of the transferred asset is valued at the lower of the original book value of the

All amounts are in thousand euro unless otherwise stated

asset and the maximum amount of consideration that the Group may be required to pay. The Group applies the same derecognition policies for impaired financial assets.

### ***Impairment of financial assets***

Additional disclosures related to impairment of financial assets, are included in the following notes as well:

- Significant judgements in applying the Group's accounting policy. Key estimates and assumptions with high uncertainty. (Note 2.12.16);
- Trade and other receivables (Notes 3.08 and 3.09).

The Group recognizes an allowance for expected credit losses (ECL) for all debt instruments that are not measured at fair value through profit or loss. ECL are based on the difference between the contractual cash flows due under the terms of the contract and any cash flows the Group expects to receive, discounted at an approximation of the original effective interest rate. Expected cash flows include cash flows from the sale of collateral held or other credit enhancements that are an integral part of the terms of the contract.

ECL are recognized in three stages. For exposures for which there has been no significant increase in credit risk since initial recognition. Allowances for ECL are recognized for credit losses that arise as a result of default events that are possible occur within the next 12 months (12-month ECL). For exposures for which there has been a significant increase in credit risk since initial recognition, an allowance for expected credit loss is required in respect of credit losses expected over the remaining term of the exposure, regardless of when the default occurs (ECL over the lifetime of the instrument). A significant increase in credit risk is observed in the case of material financial difficulties of the debtor, probability of declaring bankruptcy and liquidation, financial restructuring or inability to repay the debt (overdue for more than 30 days) are taken as an indicator for impairment of the asset.

Regarding cash and cash equivalents, the Group applies the credit ratings of the banks and publicly available information on default rates for banks in order to prepare an impairment assessment. The Group uses historical experience in order to determine loss given default. As significant increase in credit risk has not been identified, the Group applies 12-month ECL.

The Group considers a financial instrument in default when contractual payments are overdue for 90 days. However, in certain cases, it may consider a financial asset to be in default when internal or external information provides an indication that it is unlikely that the Group will receive the outstanding contractual amounts in full before taking into account any credit improvements. All financial assets measured at amortized cost are subject to collective impairment, except for those in default (phase 3).

### ***Financial liabilities***

All amounts are in thousand euro unless otherwise stated

### ***Initial recognition and measurement***

Upon initial recognition, financial liabilities are classified as financial liabilities at fair value through profit or loss, incl. derivatives or as financial liabilities at amortized value, incl. loans and other borrowings and trade and other payable as appropriate. Initially, all financial liabilities are recognized at fair value, and in the case of loans and borrowed funds and liabilities, net of direct transaction costs.

The Group's financial liabilities include trade and other payables, bank loans and lease liabilities.

### ***Subsequent measurement***

Financial liabilities are measured according to their classification as specified below:

#### ***Financial liabilities at amortized cost***

The Group's financial liabilities at amortized cost are reported at amortized cost after applying the effective interest method.

### ***Derecognition***

A financial liability is derecognized when the obligation is discharged, cancelled or expires. When an existing financial liability is exchanged with another from the same creditor under substantially different terms, or the terms of an existing liability are substantially changed, this exchange or modification is treated as extinguishment of the original financial liability and recognition of a new financial liability. The difference in the respective carrying amounts is recognized in the statement of comprehensive income.

The main financial instruments included in the consolidated statement of financial position of the Group are presented below.

#### ***Trade and other receivables***

Trade receivables are amounts owed by customers for goods sold and services performed in the ordinary course of business. They are usually due for short-term settlement and are therefore classified as current. Trade receivables are initially recognized at the amount of the unconditional consideration due, unless they contain significant financing components.

The Group holds trade receivables for the purpose of collecting contractual cash flows and therefore measures them at amortized cost using the effective interest method. No discounting is applied when the effect is immaterial.

Future cash flows determined for a group of financial assets that are collectively measured for impairment are determined on the basis of historical information regarding financial assets with credit risk

All amounts are in thousand euro unless otherwise stated

characteristics similar to the characteristics of the group of financial assets.

Assets that are subject to individual impairment are not included in an impairment group.

The Group applies a simplified approach in recognizing impairment of trade and other receivables and recognizes loss allowance for lifetime expected credit losses. In estimating expected credit losses on trade receivables, the Company uses a provision matrix.

When estimating expected credit losses on trade receivables, the Group uses its historical experience of credit losses on trade receivables to estimate the expected credit losses for the entire life of the financial assets.

### ***Borrowings***

Borrowings are recognized initially at fair value, which is formed by the cash proceeds received, less the inherent transaction costs. After their initial recognition, interest-bearing loans are measured at amortized cost, where any difference between the initial cost and the maturity value is recognized in profit or loss over the period of the loan by applying the effective interest method.

Finance costs, including direct borrowing costs, are included in profit or loss using the effective interest method, except for transaction costs on bank overdrafts, which are recognized in profit or loss on a straight-line basis for the period, for which the overdraft was agreed upon.

Loans are classified as current when they are to be settled within twelve months from the end of the reporting period.

### ***Payables to suppliers, other current liabilities and advances received***

Trade and other payables arise as a result of goods or services received. Current liabilities are not amortized.

Trade payables are recognized initially at fair value and subsequently at amortized cost using the effective interest method.

### **2.12.9. Cash and cash equivalents**

Cash includes cash on hand and current accounts, and cash equivalents include short-term bank deposits with an original maturity of less than 3 months. The consolidated statement of cash flows is presented using the direct method.

Cash and cash equivalents are subsequently presented at amortised cost, excluding the accumulated allowance for expected credit losses.

All amounts are in thousand euro unless otherwise stated

#### **2.12.10. Lease**

On the effective date of the contract, the Group assesses whether the contract is or contains a lease. In particular, whether the contract transfers the right to control the use of the identified asset for a certain period of time.

##### ***The Group as a lessee***

The Group applies a unified approach to the recognition and assessment of all leases, except for short-term leases (i.e., leases with a lease term of up to 12 months) and leases of low-value assets. The Group recognises lease liabilities for the payment of lease instalments and right-of-use assets, representing the right to use the assets.

##### ***Right-of-use assets***

The Group recognizes right-of-use assets from the inception date of the lease (i.e. the date on which the underlying asset is available for use). Right-of-use assets are measured at acquisition cost less accumulated depreciation and impairment losses and adjusted for any revaluation of lease liabilities.

The acquisition cost of right-of-use assets includes the amount of recognized lease liabilities, the initial direct costs incurred and the lease payments made on or before the inception date of the lease, an estimate of the costs to be incurred by the lessee in dismantling and relocating the asset, the restoration of the site on which it is located or the restoration of the asset to the condition required under the terms of the lease, less any incentives received under the lease. The right-of-use assets are depreciated on a straight-line basis over the lease term.

If at the end of the lease term the ownership of the leased asset is transferred to the Group, or the acquisition cost reflects the exercise of a purchase option, depreciation is calculated using the expected useful life of the asset.

##### ***Lease liabilities***

From the inception date of the lease, the Group recognises lease liabilities measured at the present value of the lease payments to be made during the lease term. Lease payments include fixed payments (including in-substance fixed payments) less any eligible lease incentives, variable lease payments depending on an index or an interest rate, and amounts that are expected to be paid under guarantees for residual value.

Lease payments also include the exercise price of a purchase option if the Group is reasonably certain to exercise that option, as well as penalties for terminating the lease, if the lease term reflects the Group's exercising an option to terminate the lease.

Variable lease payments, not depending on an index or an interest rate, are recognised as expense in the period in which the event or condition triggering the payment occurs.

All amounts are in thousand euro unless otherwise stated

In calculating the present value of lease payments, the Group uses an intrinsic interest rate at the inception date of the lease because the interest rate implicit in the lease cannot be determined reliably. After the inception date, the amount of lease liabilities is increased by the interest and reduced by the lease payments made.

In addition, the carrying amount of lease liabilities is revalued, if there is a modification, a change in the lease term, a change in lease payments (for example, changes in future payments resulting from a change in the index or interest rate used to determine those lease payments) or a change in the measurement of the option to purchase the underlying asset.

#### ***Short-term leases and low-value assets leases***

The Group applies recognition exemption for short-term leases to its short-term building leases (for example, leases with lease term of 12 months or less from the inception date and not containing a purchase option). The Group also applies the recognition exemption of low-value assets leases to leases of office equipment which is considered low-value. Lease payments on short-term leases and low-value assets leases are carried as an expense on the straight-line basis over the lease term.

#### **2.12.11. Provisions**

Provisions are recognised when the Group has a current (constructive or legal) liability as a result of a past event, and it is probable that the repayment/settlement of this liability will involve an outflow of resources. Provisions are estimated based on management's best estimate as at the date of preparation of the financial statements of the costs necessary to settle the respective liability. The estimate is discounted when the maturity is long-term. When part of the resources to be used to settle the liability is expected to be recovered by a third party, the Group recognises a receivable in case it is highly probable to be received, its value can be reliably measured as well as an income (credit) under the same item in the consolidated statement of financial position, where the provision itself is presented.

The Group charges warranty service provisions. Liabilities for warranty service provisions are accrued based on management's best judgment of the potential amount of costs that the Group will incur upon the occurrence of a warranty event, based on the accumulated experience of goods/products sold.

#### **2.12.12. Payables to employees**

##### ***Current payables to employees***

Current payables to employees include liabilities for work already performed and the relevant social security contributions required by law.

##### ***Defined benefit plans***

*All amounts are in thousand euro unless otherwise stated*

The Government of Bulgaria is responsible for providing pensions under defined benefit plans. The liabilities under the Group commitment to transfer accrued amounts to defined benefit plans are recognised in the statement of comprehensive income when they are incurred.

#### ***Paid annual leave***

The Group recognises as a liability the undiscounted amount of the estimated costs of paid annual leave, in accordance with the Labor Code and its internal rules, expected to be paid to employees in exchange for their labor for the past reporting period.

#### ***Retirement benefit plans***

In accordance with the requirements of the Labor Code, upon termination of the employment contract of an employee who has acquired the right to a pension, the Group pays the employee a compensation in the amount of two gross salaries, if the accumulated service at the Group is less than ten years, or six gross salaries, in case of accumulated service time at the Group of over ten consecutive years.

Based on their characteristics, these schemes are retirement benefit plans.

The measurement of long-term employee benefits is carried out using the projected unit credit method and the estimate at the date of the statement of financial position is made by licensed actuaries. The amount recognised in the statement of financial position is the present value of the liabilities. The revaluations of the retirement benefit plan liability (actuarial gain or loss), arising from experience and changes in actuarial financial and demographic assumptions, are recognised in equity through other comprehensive income as a reserve for retirement liabilities. The amounts released from this reserve are transferred through other comprehensive income into retained earnings.

#### **Share-based payments**

##### *Equity-settled share-based payment transactions*

For transactions measured by reference to the fair value of the equity instruments granted, the Group measures the fair value of the equity instruments granted at the measurement date, based on market prices if available, taking into account the terms and conditions upon which those equity instruments were granted. Fair value excludes the effects of non-market vesting conditions.

Equity-settled share-based payment transactions with employees and others providing similar services are measured at the fair value of the equity instruments at the grant date.

Share-based payment expense is recognized over the service period on a straight-line basis during the vesting period, based on the Group's estimate of the number of equity instruments that will eventually vest. A corresponding increase in equity is recognized in a share-based payment reserve against the recognized expense.

At the end of each reporting period, the Group revises its estimate of the number of equity instruments

*All amounts are in thousand euro unless otherwise stated*

expected to vest based on non-market vesting conditions. The impact of the revision of the original estimates, if any, is recognized in profit or loss so that the cumulative expense reflects the revised estimate, with a corresponding adjustment to reserves.

The related deferred tax, where applicable, is recognized in accordance with IAS 12, and the tax effect is recognized in equity within the same component in which the share-based payment transaction is recognized.

### **2.12.13. Share capital and reserves**

The Group has adopted the capital maintenance financial concept. Maintaining the share capital is assessed in nominal monetary units. Profit for the reporting period is considered acquired only if the cash /financial/ amount of equity at the end of the period exceeds the cash amount at the beginning of the period, after deducting the distributions between the owners or the capital invested by them during the period.

Shelly Group SE is a joint-stock company and is obliged to register in the Commercial Register a certain amount of share capital to serve as collateral for the claims of creditors of the Parent Company. The shareholders are responsible for the Parent Company's liabilities up to the amount of their shareholding in the capital and can claim the return of this shareholding only in bankruptcy or liquidation proceedings. The Parent Company reports its share capital at the nominal value of the shares registered in court.

**Equity** is the residual value of the Group company's assets after deducting all of their liabilities. It includes:

**Share capital** is presented in the consolidated statement of financial position at nominal value per share according to the number of shares issued of the Parent company which as of 01.01.2026 has nominal value 0.51 euro per share in connection with conversion of capital in euro, which is its new functional and presentation currency. As a result of the translation, the Parent company reports an effect of 23 thousand euro in increase in retained earnings, in accordance with the provisions of the "Law on the introduction of the euro in Republic of Bulgaria".

**Financial result** is the difference between the revenue and the related costs charged.

Equity is reported less the distributed dividends of the owned shares during the period in which they will be distributed (by decision of the General Meeting).

According to the requirements of the Commerce Act and the Articles of Association of the Parent Company Shelly Group SE, the Group is obliged to allocate reserves at the expense of:

- at least one tenth of the profit, which is allocated until the funds reach 10 percent of the share capital;
- the funds received above the nominal value of the shares upon their issuance (premium reserve).

**Redeemed shares** are presented in the consolidated statement of financial position at cost (acquisition price), with their gross purchase price reduced by the Group's equity capital. Profit or loss from the sale of

All amounts are in thousand euro unless otherwise stated

redeemed shares are presented directly in the Group's equity, under the "Redeemed shares".

In past periods, the Group reported share-based payments to employees in Bulgarian subsidiaries. Share-based payments to employees related to services rendered are settled through equity instruments. Transferred capital instruments are measured at their fair value on the date of transfer. Share-based payment expense is recognised in the period in which the services are received.

**Reserve from recalculation of the currency of the presented foreign activity** - arises from the net effects of the translation of the accounts of subsidiaries abroad from their functional currencies into euro, for consolidation purposes.

**Share-based payment reserve** – The Group recognizes a share-based payment reserve in connection with equity instruments granted in accordance with IFRS 2 "Share-based Payment". The fair value of the granted instruments is determined at the grant date and is recognized as an expense over the vesting period, with a corresponding increase in equity – share-based payment reserve. Upon exercise of the instruments, the amounts accumulated in the reserve are transferred to share capital and/or share premium. If unexercised rights expire or are forfeited, the recognized amounts are not reversed but remain within equity.

**Reserves from revaluation of defined benefits plans** – The Group recognizes a liability related to the termination of labour contract of employees who have reached retirement age. Remeasurements of this liability, arising from experience adjustments and changes in actuarial financial and demographic assumptions, are recognized in other comprehensive income within equity as a retirement benefit reserve.

#### 2.12.14. Income tax expense

Income tax expense is the amount of current income tax and the tax effect on temporary tax differences. Current taxes on the profit of Bulgarian companies are determined in accordance with the requirements of the Bulgarian tax legislation. The nominal tax rate in Bulgaria for 2026 and 2025 is 10%.

Subsidiaries abroad are charged according to the requirements of the relevant tax laws by country, at the following nominal tax rates:

Country	Nominal tax rates per year	
	2026	2025
Germany	30%	30%
USA	15-35%	15-35 %
China	25%	25%
Slovenia	22%	22%
Poland	19%	19%

Deferred income tax is calculated using the balance sheet liability method. Deferred tax liabilities are calculated and recognised for all taxable temporary differences, while deferred tax assets are recognised only if likely to be reversed and if the Group will be able to generate sufficient profit in the future from which they can be deducted.

All amounts are in thousand euro unless otherwise stated

The effect of recognising deferred tax assets and/or liabilities is reported where the effect of the event that gave rise to them is presented.

For events affecting profit or loss and other comprehensive income, the effect of deferred tax assets and liabilities is recognised in the consolidated statement of comprehensive income.

For events that are initially recognised in equity (revaluation reserve) deferred tax assets and liabilities are recognised in the consolidated statement of comprehensive income.

Deferred tax assets and/or liabilities are presented offset the consolidated statement of financial position as they are subject to a uniform taxation regime in the country.

As of March 31, 2026, the Group recognises income tax expenses only for Bulgarian companies and at a 10% tax rate, for the German entity at 30% tax rate, for the Chinese entity at 25% tax rate, for the Slovenian entity at 22% tax rate and for the Polish entity at 19% tax rate.

#### **2.12.15. Earnings per share**

Earnings per share are calculated by dividing the net profit or loss for the period attributable to shareholders by the weighted average number of ordinary shares held for the period.

The weighted average number of shares is the number of ordinary shares held at the beginning of the period, adjusted by the number of ordinary shares repurchased and newly issued during the period, multiplied by the time average factor. This factor represents the number of days particular shares were held compared to the total number of days during the period.

Diluted earnings per share are not calculated because there are no potentially diluted shares issued.

#### **2.12.16. Significant judgements in applying the Group's accounting policy**

##### ***Key estimates and assumptions with high uncertainty***

When applying the accounting policy, the Group's management makes certain estimates that have a significant effect on these financial statements. Such estimates, by definition, rarely equal actual results.

Given their nature, these estimates are subject to ongoing review and updating and summarize historical experience and other factors, including expectations of future events that management believes are reasonable under current circumstances.

Estimates and assumptions that carry a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities in the next financial year are set out below.

*All amounts are in thousand euro unless otherwise stated*

In performing this assessment, the current macroeconomic environment and the development of the geopolitical situation throughout 2026 and as of the date of preparation of these consolidated financial statements were taken in account, with a specific focus on the following factors:

**The military conflict in Ukraine:** The Group continues to monitor the indirect effects of the conflict, including energy market volatility, inflationary pressures, and supply chain disruptions. As of the date of preparation of these consolidated financial statements, the Group companies have no direct exposure or significant assets in the affected regions that would jeopardize its liquidity.

**The conflict in the Middle East:** Management acknowledges the potential risks of destabilization of global trade routes and the subsequent effect on transport costs. The analysis performed indicates that, as of the current date, these events do not have a material impact on the Group's operational capacity to service its obligations.

#### ***Defined benefit plans***

The employee defined benefit obligation is determined by actuarial valuation. This estimate requires assumptions on the discount rate, future wage growth, staff turnover and mortality rates. Due to the long-term nature of defined benefit plans, these assumptions are subject to significant uncertainty. The Group prepared an actuarial valuation of defined benefits and reported them in the consolidated financial statements at the end of 2026. As of 31.03.2026 the Group has not calculated new actuarial valuation(note 3.13).

#### ***Useful lives of property, plant and equipment and intangible assets***

Financial reporting of property, plant and equipment and intangible assets includes the use of estimates of their expected useful lives and carrying amounts, based on the Group management's judgments.

#### ***Impairment of receivables***

Management estimates the volume and timing of expected future cash flows related to receivables based on experience versus current circumstances. Due to the inherent uncertainty of this estimate, actual results may differ. Group's management compares prior year estimates with actual results.

The Group uses a simplified approach in reporting trade and other receivables and recognises an impairment loss as expected credit losses over the entire term. They represent the expected shortfall in contractual cash flows, given the possibility of default at any point in the life of the financial instrument. The Group uses its experience, external indicators and information to calculate expected credit losses in the long-term.

#### ***Impairment of property, plant and equipment***

At the date of preparation of the financial statements, the Group's management organizes an impairment review of property, plant and equipment.

All amounts are in thousand euro unless otherwise stated

As of March 31, 2026, such review was carried out, as result of which management considered that no impairment indicators were available. No impairment loss on property, plant and equipment is reported in the consolidated financial statements.

### ***Impairment of inventories***

At the date of preparation of the financial statements, the Group's management reviews and analyses existing inventories. A review and analysis of all available inventories is made in terms of basic indicators – uniformity, commercial appearance, expiry date, etc., and expert prices are determined.

The proposed expert prices are consistent with the prices reached under concluded contracts for realization on the domestic and foreign markets, the dynamics of supply and demand of inventories, the latest price levels and trends in transactions with similar inventories. For the calculation of the net realisable value of individual types of inventories, the estimated direct costs associated with sales are excluded from determined expert selling prices. When assessing the inventories for which sales contracts are concluded, the net realisable value is determined based on the contract price less the cost of sales. Inventories not related to sales contracts are valued according to assumptions about the possibilities for their future disposal.

As of March 31, 2026, the Group has not recognized an impairment of inventory.

The impairment of inventories is calculated as the difference between their carrying amount, as recognized in the consolidated statement of financial position prior to review and analysis, and their net realisable value, determined on basis of expert prices as set out above.

### ***Income taxes***

The companies in the Group are tax entities under the jurisdiction of the tax administration in the country in which they operate. A significant estimate needs to be made to determine the tax provision. There are numerous examples for which the tax finally determined is unspecified in the normal course of business. Group companies recognise liabilities for expected tax payables based on the judgement of the management of the relevant company and the Group. When the final tax result of such events is different from the amounts originally recognized, those differences will affect current income tax and deferred tax provisions in the tax revisions period.

### ***Leases***

*Determining the lease term for contracts with renewal and termination options – the Group as a lessee*

The Group defines the lease term as the irrevocable term of the lease, together with any periods covered by an option to extend it if it is reasonably certain that the option will be exercised, or any periods covered by a termination option if it is reasonably certain that the option will not be exercised (note 3.12).

*All amounts are in thousand euro unless otherwise stated*

### **2.12.17. Fair values**

Some of the Group's accounting policies and disclosures require a fair value measurement of financial and non-financial assets and liabilities.

When measuring the fair value of an asset or liability, the Group uses observable data as far as possible.

Fair values are categorized at different levels in the fair value hierarchy based on the inputs to the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for similar assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that, directly (i.e., as prices) or indirectly (i.e., derived from prices), are available for observation for the asset or liability.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable input data).

If the inputs used to measure the fair value of an asset or liability can be categorized at different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety at that level of the fair value hierarchy whose input information is relevant to the overall assessment.

The Group recognizes transfers between levels of the fair value hierarchy at the end of the reporting period in which the change occurs. In 2025 and as of 31.03.2026 there have been no transfers between the levels of the fair value hierarchy.

More information on the assumptions made in measuring fair values is included in the relevant notes.

All amounts are in thousand euro unless otherwise stated

In 2026, vehicles amounting to the value of 133 thousand euro, together with the accumulated depreciation, were transferred and classified as right-of-use assets (see Note 3.03).

In the first quarter of 2026, the Group purchased a line for production of shell devices in the amount of EUR 909 thousand. Part of the value of this investment is subject to financing under the "Competitiveness and Innovation in Enterprises" program 2021-2027.

All amounts are in thousand euro unless otherwise stated

### 3.07. Inventory

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Goods	18 599	15,603
Goods in transit	269	648
Materials stored abroad	1 573	1,470
Materials stored in Bulgaria	2 198	1,787
<b>Total</b>	<b>22 639</b>	<b>19 508</b>

As of March 31, 2026, the consolidated statement of financial position includes:

- Materials stored abroad representing components for production, purchased on behalf of the Group, by its main suppliers of production services amounting to 1 573 thousand euro. The components are available in the warehouses of the suppliers, and the Group holds the title on the components;
- Goods in transit that are not available in the Group's warehouses, but which it owns under purchase agreements.

It is the policy of the Group companies to strive to maintain optimal stock levels equal to the estimated sales for several months ahead. The Group's management believes that the trend for the foreseeable future is for stock levels to increase as a result of growing sales as well as an increasing assortment of devices.

As of 31.12.2026 and 31.12.2025, the Group has no accrued impairment of goods and inventories.

### 3.08. Trade receivables

	<b>March 31, 2026</b>	<b>December 31, 2025</b>

<b>Total</b>	<b>19 757</b>	<b>13 685</b>

The Group's cash is in bank accounts with banks with a stable long-term rating.

All amounts are in thousand euro unless otherwise stated

The Management has assessed the expected credit losses on Cash and cash equivalents. The estimated credit losses are insignificant and are not recognized in the consolidated financial statements of the Group as of March 31, 2026.

### 3.11. Bank loans

Bank loans are as follows:

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
UBB AD, incl.:	2 873	2 955
– up to one year	2 873	2 955
– over one year		
Other short-term financing Shelly USA	80	77
Other short-term financing Shelly Tech	80	80
Other short-term financing Shelly DACH	17	16
Other short-term financing Shelly Asia	252	243
<b>Total bank loans – non-current portion:</b>	<b>-</b>	<b>-</b>
<b>Total bank loans – current portion:</b>	<b>3 302</b>	<b>3 371</b>

The subsidiaries Shelly USA and Shelly DACH use financing under company credit card. The Slovenian company Shelly Tech d.o.o. uses factoring services. The subsidiary Shelly Asia uses a short-term bank loan with maturity 09.06.2026 for working capital purposes. The subsidiary Shelly Europe EOOD has an agreed bank financing in the form of an overdraft, with a limit of 10 million euro and a credit line with a total limit of 13 million euro. As of 31.03.2026 the utilized amounts under the limits are 2 873 thousand euro. Details of the parameters of the provided financing are presented in Note 5.

### 3.12. Lease liabilities

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Lease liabilities		
– up to 1 year	774	819
– more than 1 year	4 729	4 743
<b>Total</b>	<b>5 503</b>	<b>5 562</b>

The liabilities under lease contracts presented in the consolidated statement of financial position include the Group's liabilities under lease contracts for offices and vehicles, which are recognized in accordance with the requirements of IFRS 16 Leases.

### 3.13. Retirement benefits obligation

As of December 31, 2026, the Group reports obligations for a defined benefit plan upon retirement of 250 thousand euro. The amount of the obligation is determined on the basis of an actuarial assessment based

All amounts are in thousand euro unless otherwise stated

on assumptions about mortality, disability, probability of leaving, salary growth, etc. As of 31.03.2026 no new actuarial assessment was created.

The movements of the present value of the defined benefits plan upon retirement:

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
<b>Liabilities at the beginning of the year</b>	<b>250</b>	<b>167</b>
Liabilities paid during the year	-	-
Current service expense	-	29
Interest expenses	-	5
Actuarial loss recognized in other comprehensive income	-	49
<b>Liabilities at the end of the period</b>	<b>250</b>	<b>250</b>

In the case of early retirement due to disability, the staff shall be entitled to a benefit of up to two months' salaries, increased by 100% for a minimum period of five years and provided that no such benefits have been received during the last five years of service.

The demographic statistical assumptions used in the actuarial estimate as of 31.12.2025 are based on the following:

- turnover rate of the Group's staff over the past few years;
- mortality of the population of Bulgaria in the period 2022 – 2024 according to the data of the National Statistical Institute;
- statistics of the National Center for Health Information on disability of the population and premature retirement.

### 3.14. Trade payables

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Suppliers	9 764	8 657
Customer advances	35	16
<b>Total</b>	<b>9 799</b>	<b>8 673</b>

### 3.15. Payables to employees and social security obligations

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Liabilities under employment relationships	573	931
Liabilities for management bonuses	407	407
Liabilities for unused paid leave	560	606
Liabilities to insurance companies	328	296
<b>Total</b>	<b>1 868</b>	<b>2 240</b>

The liabilities of EUR 407 thousand related to the management bonus are subject to approval by the

All amounts are in thousand euro unless otherwise stated

General Meeting of Shareholders.

### 3.16. Other liabilities

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
<b>Tax payables, including</b>	<b>2 962</b>	<b>4 648</b>
Corporate tax	2 246	1 328
Value Added Tax	282	2 328
Income tax	87	60
Payables to customs	287	871
Other taxes	60	61
<b>Other liabilities, including</b>	<b>1 466</b>	<b>1 474</b>
Liabilities for participations	74	89
Warranty service provisions	923	923
Guarantees/Rental deposits	8	8
Deferred income	452	440
Other	9	14
<b>Total other liabilities</b>	<b>4 428</b>	<b>6 122</b>

Deferred income relates to one-year paid subscriptions for the use of the Shelly APP premium service.

### 3.17. Share capital

SHELLY GROUP SE is registered in 2010. The registered capital of the Parent Company as of March 31, 2026, amounts to 9 261 thousand euro and is distributed in 18 158 060 ordinary registered shares with value of 0.51 euro each. The conversion of the share capital into euros was made according to the rules set out in the law on the introduction of the euro in the Republic of Bulgaria for the purposes and presentation in this report. As of the date of preparation of the report, the conversion has not yet been reflected in the Commercial Register, the deadline for this is 31.12.2026. As of 31.03.2026 and as of 31.12.2025, the registered share capital is fully paid up. The shareholders of the Parent Company as of 31.12.2025 and 31.03.2026 are disclosed in note 1.2.

### 3.18. Retained earnings

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
<b>Balance at the beginning of the year</b>	<b>85 793</b>	<b>63 060</b>

As of December 31, 2025, the total amount utilized under the overdraft and the credit facility amounted to 2 955 thousand euro. As of December 31, 2025 the amount utilized under the bank guarantee of Eurobank Bulgaria EOOD is 209 thousand euro and relates to a signed office lease agreement for a period of 10 years.

## 6. Related party transactions

During the reporting period Shelly Group SE has no transactions concluded with interested parties within the meaning of the POSA.

Shelly Group SE has no transactions which are beyond of its ordinary business activity or significantly deviate from market conditions with its subsidiaries and associated companies. Transactions with subsidiaries within its ordinary business activity are excluded from consolidation.

All amounts are in thousand euro unless otherwise stated

### **Key management personnel**

Until the period of 31.03.2026 for the members of the Board of Directors is accrued and paid gross permanent remuneration (including employer's social security contributions) at the total amount of 200 thousand euro (2025: 201 thousand euro). The remuneration paid was in accordance with the Remuneration policy.

As of March 31, 2026 the members of the Board of Directors are:

- Christoph Vilanek - Chairman
- Nikolay Martinov - Deputy Chairman
- Dimitar Dimitrov - Executive Director and Representative
- Wolfgang Kirsch - Executive Director and Representative
- Svetlin Todorov - Member of the Board of Directors and Representative

### **Share-based payments**

As of the end of 2025, respectively as of 31.03.2026, the company recognizes a share-based payment obligation to its executive directors as a result of the scheme adopted in 2022 for granting remuneration in the form of share options to the executive members of the Board of Directors. Based on the objectives set in the scheme and the Company's assessment of the extent to which these objectives have been achieved, the executive members are entitled to receive options to acquire 712,200 shares (out of a possible maximum total number of 890,250 shares). The occurrence of the conditions for exercising options is subject to assessment by the General Meeting of Shareholders of SHELLY GROUP ED, and the decision of the General Meeting determines the number of shares that the executive directors of the Company are entitled to receive upon exercise of the relevant options.

### **Annual cash bonus**

According to a decision of the General Meeting of Shareholders dated 02.06.2025, an amendment to the remuneration policy for the executive members of the Board of Directors for 2025 was approved, who are entitled to receive a variable cash remuneration (annual bonus), the amount of which depends on the achieved financial results for the financial year 2025. The final amount of the bonus should be approved by the general meeting of shareholders upon adoption of the audited consolidated financial statements of the Company for 2025. As of 31 December 2025, the company has made a total accrual for an annual bonus in the amount of EUR 407 thousand for the two executive members of its Board of Directors.

All amounts are in thousand euro unless otherwise stated

## 7. Financial instruments by categories

The structure of the financial assets and liabilities by categories is as follows:

<b>March 31, 2026</b>			
<b>Financial assets according to the Statement of financial position</b>	<b>Financial assets at amortized cost - Cash</b>	<b>Financial assets at amortized cost</b>	<b>Total</b>
Cash and cash equivalents	19 757	-	<b>19 757</b>
Trade receivables	-	65 512	<b>65 512</b>
Deposits in commercial companies and guarantees	-	180	<b>180</b>
<b>TOTAL FINANCIAL ASSETS</b>	<b>19 757</b>	<b>65 692</b>	<b>85 449</b>

<b>March 31, 2026</b>			
<b>Financial liabilities according to the Statement of financial position</b>	<b>Financial liabilities at amortized cost</b>	<b>Total</b>	
Lease liabilities	5 503	<b>5 503</b>	
Bank loans	3 302	<b>3 302</b>	
Trade liabilities	9 764	<b>9 764</b>	
Liabilities for participations	74	<b>74</b>	
Guarantees	8	<b>8</b>	
<b>TOTAL FINANCIAL LIABILITIES</b>	<b>18 651</b>	<b>18 651</b>	

<b>December 31, 2025</b>			
<b>Financial assets according to the Statement of financial position</b>	<b>Financial assets at amortized cost - Cash</b>	<b>Financial assets at amortized cost</b>	<b>Total</b>
Cash and cash equivalents	13 685	-	<b>13 685</b>
Trade receivables	-	66 863	<b>66 863</b>
Deposits in commercial companies and guarantees	-	128	<b>128</b>
<b>TOTAL FINANCIAL ASSETS</b>	<b>13 685</b>	<b>66 991</b>	<b>80 676</b>

<b>December 31, 2025</b>			
<b>Financial liabilities according to the Statement of financial position</b>	<b>Financial liabilities at amortized cost</b>	<b>Total</b>	
Lease liabilities	5 562	<b>5 562</b>	
Bank loans	3 371	<b>3 371</b>	
Trade liabilities	8 656	<b>8 656</b>	
Liabilities for participations	89	<b>89</b>	
Guarantees	8	<b>8</b>	
<b>TOTAL FINANCIAL LIABILITIES</b>	<b>17 686</b>	<b>17 686</b>	

The fair value of the bank loans that the Group is using, is determined based on market interest rate applicable for similar instruments with similar term.

All amounts are in thousand euro unless otherwise stated

## 8. Financial risk management

In the course of their usual business activity, the companies of the Group may be exposed to various financial risks, the most important of which are: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The overall risk management is focused on forecasting changes in financial markets in order to minimize the potential negative effects that could affect the financial results. Financial risks are currently identified, measured and monitored using various control mechanisms to adequately assess market conditions and their effects by the companies of the Group to avoid unjustified concentration of any specific risk.

Risk management is carried out on an ongoing basis under the direct supervision of the management and the Group's financial experts in accordance with the policy set by the Board of Directors of the Parent Company who developed the basic principles of general financial risk management. Based on these principles, the specific procedures for managing separate specific financial risks have been defined.

The following describes the different types of risks to which the companies within the Group are exposed, as well as the approach taken in managing these risks.

### Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market prices.

#### a. Currency risk

The companies within the Group carry out their transactions on the domestic market, in the European Union and in third countries (Asia and USA). The companies within the Group carry out their main deliveries in euros and US dollars. To control the currency risk, a system has been introduced for planning supplies from countries in and outside the European Union, as well as procedures for monitoring movements in exchange rates of foreign currencies and control of incoming payments.

The tables below summarize the currency risk exposure:

March 31, 2026	In EUR	In USD	In other foreign currency	In BGN	Total
Cash and cash equivalents	16 961	896	1 900	-	19 757
Trade receivables	54 973	10 302	237	-	65 512
Deposits in commercial companies	145	14	21	-	180
<b>TOTAL ASSETS</b>	<b>72 079</b>	<b>11 212</b>	<b>2 158</b>	<b>-</b>	<b>85 449</b>

All amounts are in thousand euro unless otherwise stated

Lease liabilities	5 322	-	181	-	5 503
Bank loans	2 970	80	252	-	3 302

Bank loans	96	77	243	2 955	3 371
Trade payables	4 971	694	91	2 900	8 656
Liabilities for participations	0	0	0	89	89
Guarantees	0	0	0	8	8
<b>TOTAL LIABILITIES</b>	<b>10 186</b>	<b>771</b>	<b>529</b>	<b>6 200</b>	<b>17 686</b>

### Currency sensitivity analysis

There is a currency risk exposure mainly in USD. As of March 31, 2026 84% of the Group's assets are in EUR, 13% in USD. After the acquisition in the Chinese subsidiary Shelly Asia Ltd, the Group is exposed to currency risk of changes in Chinese yuan. After establishment of the Polish subsidiary Shelly Poland SP. Z O O, the Group is exposed to currency risk of changes in Polish zloty.

In the table below, a sensitivity analysis is presented to the possible changes in the exchange rate EUR/USD, EUR/PLN and EUR/CNY and the profit before taxes (through changes in the book values of monetary assets and liabilities), provided that all other variables are assumed to be constant.

	Increase/ Decrease in exchange rate BGN/ foreign currency %	Effect on the profit before tax EUR/USD	Effect on the profit before tax EUR/CNY	Effect on the profit before tax EUR/PLN
31.12.2025	+/-1.00%	34	16	4
31.03.2026	+/-1.00%	112	17	2

### b. Price risk

All amounts are in thousand euro unless otherwise stated

The companies within the Group are exposed to a specific price risk regarding the prices of the goods and services offered. Minimizing the price risk for negative price changes is achieved by periodically reviewing contractual relationships and revising and updating prices in relation to market changes. In view of the increasing sales revenue in the US, but given the still low share of the US business in the Group's total sales revenue, the Parent Company expects the current tariff disputes to have only a negligible effect on the sales performance and revenue.

### Risk of the interest-bearing cash flows

The companies within the Group do not have a significant concentration of interest-bearing assets, except for loans granted and cash on current accounts with banks, therefore the revenue and operating cash flows are not largely dependent on changes in market interest rates.

At the same time, the cash outflows of the companies within the Group are exposed to interest rate risk from utilizing a bank loans and lease, agreed with a variable interest rate.

Cash on current accounts with banks bear interest at interest rates according to the tariffs of the respective banks.

The exposure of the companies within the Group is currently monitored and analyzed to changes in market interest rates. Different refinancing scenarios, renewal of existing interest-bearing positions and alternative financing are considered.

<b>March 31, 2026</b>	<b>Interest-free</b>	<b>With floating interest %</b>	<b>With fixed interest %</b>	<b>Total</b>

### Credit risk

The financial assets of the companies within the Group are concentrated in two groups: cash (cash on hand and at bank accounts) and receivables from clients.

Credit risk is mainly the risk that the customers of the companies within the Group will not be able to pay in full and within the usual deadlines the amounts owed by them. Trade receivables are presented in the consolidated statement of financial position at amortized cost. An impairment has been charged for doubtful and uncollectible loans, as there have been events identifying uncollectible losses based on past experience.

The companies within the Group do not have significant concentration of credit risk. Their policy is to negotiate a credit period longer than 60 days only with customers who have a long history and commercial cooperation with them. Payments from customers for sales are mainly made by bank transfer.

Significant part of Group's revenue is generated by large companies with good credit rating.

The collection and concentration of receivables is monitored on an ongoing basis, according to the established policy of the companies within the Group. For this purpose, the open positions by clients, as well as the received receipts, are periodically reviewed by the financial and accounting department and the management, and an analysis of the unpaid amounts is performed.

In addition, the Group has an insurance on the receivables from 44 of its largest customers.

As of March 31, 2026 cash and the payment operations of the companies within the Group are spread over several banks which limits the risk for cash and cash equivalents.

Management has defined its policy for assessing credit losses. For trade receivables, the simplified method is applied, with percentages determined based on past experience.

As of December 31, 2025, the Group recognized an impairment of receivables amounting to 762 thousand euro is recognised. As of December 31, 2025, the Group has collected impaired receivables in the amount of 143 thousand euro. Additionally, as of the end of 2025 the Group recognized impairment of advances at the amount of 1 016 thousand euro.

All amounts are in thousand euro unless otherwise stated

Group's credit risk exposure arising from its financial assets as of March 31, 2026 and December 31, 2025 is presented below:

	<u>March 31, 2026</u>	<u>December 31, 2025</u>

## Liquidity risk

Liquidity risk is the risk that the Group experiences difficulties meeting its obligations with respect to financial liabilities settled with cash or another financial asset.

The companies within the Group carry out a conservative liquidity management policy, through which they constantly maintain an optimal liquid stock of cash. Borrowed credit resources are also used.

In order to control the liquidity risk, the companies within the Group monitor the timely payment of the incurred liabilities according to agreed terms of payment.

The Companies within the Group monitor and control the actual and projected cash flows for periods ahead and maintain a balance between the maturity limits of the assets and liabilities of the Company. Currently, the maturity and timely execution of payments is monitored by the finance and accounting departments, maintaining daily information on available cash and upcoming payments.

All amounts are in thousand euro unless otherwise stated

## Capital risk management

With the capital management the Parent Company aims to create and maintain opportunities for it to continue to operate as a going concern and to ensure the appropriate return on investment of shareholders, and to maintain optimal capital structure, to reduce capital expenses.

Shelly Group SE currently monitors the capital structure based on the debt ratio. This ratio is calculated between the net debt capital and the total amount of capital. Net debt capital is defined as the difference between all borrowings (current and non-current) as stated in the consolidated statement of financial position and the cash and cash equivalents. The total amount of capital is equal to the equity and net debt capital.

The table below presents the debt ratios based on the capital structure:

	<b>March 31, 2026</b>	<b>December 31, 2025</b>
Total debt capital, incl.	25 150	26 218
-Bank loans	3 302	3 371
-Lease liabilities	5 503	5 562
Less: cash and cash equivalents	(19 757)	(13 685)
<b>Net debt capital</b>	<b>5 393</b>	<b>12 533</b>
Total equity	114 775	107 028
<b>Total capital</b>	<b>120 168</b>	<b>119 561</b>
<b>Debt ratio</b>	<b>4.49%</b>	<b>10.48%</b>

In first quarter of 2026, the Group reported an improvement in the debt ratio mainly due to an increase in cash as of 31.03.2026. As of the date of approval of these interim consolidated financial statements, the Group's trade and other payables are being serviced in accordance with the agreed, respectively, statutory payment terms.

## 9. Fair values

For the purposes of disclosing fair value, the Group defines different classes of assets and liabilities depending on their nature, characteristics and risk and the respective level of the fair value hierarchy specified in note 2.12.17. Fair Values.

The Group's management has considered that the book values of cash and cash equivalents, trade and other receivables approximate their fair values due to the short-term nature of these financial instruments.

The attached table shows the book values and fair values of financial assets and liabilities, including their levels in the fair value hierarchy. Fair value information is not included if the book value is reasonably close to the fair value.

The table below presents the hierarchy of the fair value of the Group's assets and liabilities in accordance with IFRS 13:

All amounts are in thousand euro unless otherwise stated

<b>March 31, 2026</b>	<b>Book value</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
<b>Financial assets</b>				
Cash and cash equivalents	19 757	-	19 757	-
<b>TOTAL ASSETS</b>	<b>19 757</b>	<b>-</b>	<b>19 757</b>	<b>-</b>
<b>Financial liabilities</b>				
Lease liabilities	5 503	-	5 075	-
Bank loans	3 302	-	3 302	-
<b>TOTAL LIABILITIES</b>	<b>8 805</b>	<b>-</b>	<b>8 377</b>	<b>-</b>
<b>December 31, 2025</b>	<b>Book value</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>
<b>Financial assets</b>				
Cash and cash equivalents	13 685	-	13 685	-
<b>TOTAL ASSETS</b>	<b>13 685</b>	<b>-</b>	<b>13 685</b>	<b>-</b>
<b>Financial liabilities</b>				
Lease liabilities	5 562	-	5 102	-
Bank loans	3 371	-	3 371	-
<b>TOTAL LIABILITIES</b>	<b>8 933</b>	<b>-</b>	<b>8 473</b>	<b>-</b>

The fair value of the financial liabilities included in Level 2 in the table above was determined in accordance with the generally accepted valuation model based on discounted cash flows, the interest rate on the loan was used as a discount factor.

The fair value of trade receivables, short-term financial assets, trade payables and other liabilities approximates their carrying amount as these assets/liabilities are short-term in nature and there are not subject to effects, that lead to different fair value.

## 10. Events after the end of the reporting period

No adjusting events or significant non-adjusting events have occurred between the date of these interim consolidated financial statements and the date of their approval for issue.
